Market conditions/environment July 1st 2021 to June 30th 2022 (Unaudited)

After a very strong first half of 2021, global markets begun to experience a series of wobbles in the second half of the year, driven by four primary factors: a deceleration of US growth, weaker data from China and the prospect of a default from China's second largest property developer, the emergence of a highly transmissible Covid-19 variant and the acknowledgement from the US Federal Reserve that inflation might not be as "transitory" as initially expected. Despite this growing list of concerns and several short lived sell-offs, markets broadly shrugged off these risks, with US equities¹ (+11.6%) finishing the second half of the year on a firm footing, whilst bonds² (+0.1%) were flat.

However, that all changed in the first half of 2022 as many of these concerns came home to roost, with the first half of the new year establishing new records for weakness in major asset classes since the 1970s and dragging 12 month performance firmly into negative territory. Over the full period US equities fell -10.6%, bonds -8.9%, and consequently the traditional 60/40 portfolio declined 10.2%³. Commodities⁴ (+24.2%) and the US Dollar⁵ rallied (+13.3%) over this period, whilst gold⁶ was little changed (+1.7%).

The sharp decline in equities and bonds begun after the US Federal Reserve continued its hawkish pivot in reaction to persistently high inflation, which was then overshadowed and exacerbated by the unfolding geopolitical events in Eastern Europe, with Russia's invasion of Ukraine in late February becoming a grim reality. This had a significant effect on financial markets, especially within commodities which rallied amidst supply disruption, and further fuelling inflation pressures that had been building since late 2020.

Concurrently China continued with their net zero Covid strategy by imposing severe restrictions on regions accounting for nearly twenty per cent of GDP in the worlds manufacturing hub, whilst also continuing their crackdown on excesses within the Chinese real estate sector, which has been an important driver of their economy. The rolling lockdowns increased the risk of additional supply bottlenecks putting further pressure on global inflationary forces. Although there was some relief late in Q2 as investor sentiment was buoyed by China's faster than anticipated reopening, the consequences of a possible continued decline in property values are yet to be seen.

In the face of spiking inflation globally, Central banks finally tore up their transitory inflation rationale and decided to stand firm behind their stable price level mandate, causing investors to price in the start of sharp hiking cycles. This change in stance is something that has not happened in the developed world for over a

¹ S&P 500 Total Return Index. Calculated intraday by S&P based on the price changes and reinvested dividends of SPX <INDEX> with a starting date of Jan 4, 1988 (Ticker: SPXT Index)

1

² Barclays Global Aggregate Bond Index (USD Hedged): The Barclays Global Aggregate Bond Index is a flagship measure of global investment trade debt from twenty-four local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging market issuers. (Ticker: LEGATRUH Index).

³ Traditional 60/40 equity/bond portfolios, modelled using SPXT Index (S&P 500 Total Return) and LEGATRUH Index (Barclays Global Aggregate).

⁴ Bloomberg Commodity Total Return Index is composed of futures contracts and reflects the returns on a fully collateralized investment in the Bloomberg Commodity Index (Ticker: BCOM). This combines the returns of BCOM with the returns on cash collateral invested in 13 weeks (3 Month) U.S. Treasury Bills. (Ticker: BCOMTR Index).

⁵ The U.S. Dollar Index (USDX) indicates the general international value of the USD. The USDX does this by averaging the exchange rates between the USD and major world currencies. The ICE US computes this by using the rates supplied by some 500 banks. (Ticker: DXY Curncy)

⁶ The Gold Spot price is quoted as US Dollars per Troy Ounce. Gold Cross rates are available using XAU followed by 3-character ISO code of the cross currency (Ticker: XAU Curncy)

decade and even spread to regions such as Europe and the European Central Bank, who had initially reacted timidly to inflation, ultimately becoming more hawkish in the face of persistently high inflation. Amidst the renewed hiking from central banks, markets finished the first half of the year increasingly concerned about how much the economy could withstand and an ensuing growth slowdown. It is yet to be seen if the measures undertaken are sufficient to balance the printing of unprecedented amounts of money globally over the last decade, which was accelerated in response to the pandemic.

Within equities, growth stocks, which are heavily weighted towards the technology sector, were hit especially hard by rising interest rates, with the MSCI World Growth Index falling (-23.2%)⁷ over the 12 month period. Meanwhile, the MSCI World Energy Index posted a strong gain (+31.2%)⁸ as supplies remained tight and defensives such as utilities (+15.9%)⁹ outperformed more cyclical sectors. Global commodities registered broad based gains, with oil flying high (+78%)¹⁰. The US dollar rallied strongly against a broad basket of currencies (+13.3%) as investors priced in an aggressive hiking cycle from the US Federal Reserve. Investors were reminded of the real interest rate risk in inflation protection bonds with U.S. TIPS¹¹ down significantly (-6.4%) the first 6 months of the year even with inflation spiking.

In this environment of rising rates, traditional portfolios failed to provide investors with any meaningful diversification, as both equities and bonds continued lower together. For the last four decades bonds have generally provided both great diversification and positive returns, with monetary policy being the dominant market stabiliser of the last decade. However, with inflation becoming a dominant investment risk and central banks under increasing political pressure to control inflation in the face of declining real wages, the role of bonds as a defensive asset within portfolio should not be taken for granted.

⁷ MSCI World Growth Net Total Return USD Index. The MSCI World GROWTH USD Net Total Return Index is a free-float weighted equity index. (Ticker: M1WO000G Index)

⁸ MSCI World Energy Net Total Return USD Index. The MSCI World/Energy Net Index is a free-float weighted equity index. The parent index is M1WO. (Ticker: M1WO0EN Index)

⁹ S&P 500 Utilities Total Return Index. Calculated intraday by S&P based on the price changes and reinvested dividends of S5UTIL <INDEX> (Ticker: SPTR5UTL Index)

¹⁰ Brent Crude. Current pipeline export quality Brent blend as supplied at Sullom Voe. ICE Brent Futures is a deliverable contract based on EFP delivery with an option to cash settle. (Ticker: CO1 Comdty)

¹¹ S&P 7-10 Year US Treasury TIPS Index Total Return. Calculated intraday by S&P based on the price changes and reinvested coupons of SPBDUPO <INDEX> (Ticker: SPBDUPOT Index)

Fund Performance July 1st 2021 to June 30th 2022

From July 1, 2021 to June 30, 2022, Fulcrum Diversified Absolute Return Institutional Class shares returned –0.09%.

Importantly for an absolute return strategy, the portfolio exhibited very low sensitivity to traditional assets, demonstrating the important role it can play in an investment portfolio during periods of weakness for traditional portfolios.

The Fund's performance was driven by our relative value strategies, with broad based gains across all assets but particularly strong contributions from our negative views on government bonds in a range of countries.

Diversifying strategies also performed well, capturing the dominant trends across commodities, fixed income and currency markets.

Directional strategies and our exposure to North American equities was the largest detractor as would be expected in a large equity drawdown, but these exposures were limited and dampened by our hedges.

With both the expected returns and diversification properties of a traditional portfolio being far less appealing now, we believe investors should consider adopting investments that can perform in varying macroeconomic environments when deciding their asset allocation. The diversification properties of bonds is not constant, but instead evolves with the macroeconomic environment which today is no longer dominated by artificially low rates. This is a world for which most investors are unprepared as they continue to rely upon past correlations of stocks and bonds.

Our focus on diversification remains high, with investment ideas diversified by asset class, time horizon and strategy. This broad and flexible approach is one that enables us to seek to deliver returns in the broadest range of market environments and with no real reliance upon fixed income for returns or diversification benefits. We believe there can be benefits to adding an actively managed and diversified absolute return focused fund to portfolios.

It is not possible to invest directly in an index.

Opinions expressed are those of Fulcrum Asset Management LLP and are subject to change, are not guaranteed and should not be considered investment advice.

Past performance does not guarantee future results. Investment performance reflects fee waivers in effect. In the absence of such waivers, total return would be reduced.

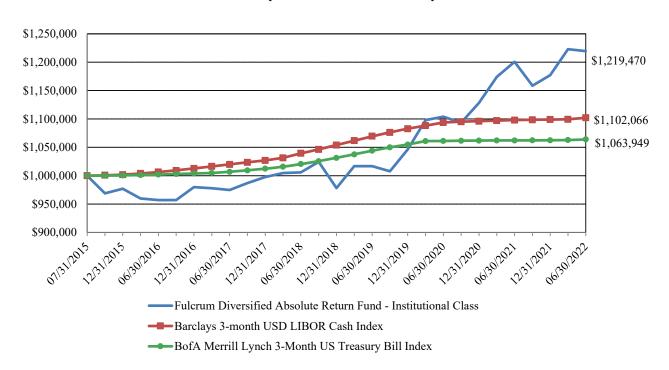

Mutual fund investing involves risk. Principal loss is possible. Absolute return strategies are not designed to outperform stocks and bonds during strong market rallies. Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commoditylinked derivative investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, embargoes, tariffs and international economic, political and regulatory developments. Derivatives involve special risks including correlation, counterparty, liquidity, operational, accounting and tax risks. These risks, in certain cases, may be greater than the risks presented by more traditional investments. The Fund may use leverage which may exaggerate the effect of any increase or decrease in the value of portfolio securities or the Net Asset Value of the Fund, and money borrowed will be subject to interest costs. The Fund invests in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater in emerging markets. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and nonrated securities presents a greater risk of loss to principal and interest than higher-rated securities. Diversification does not assure a profit nor protect against loss in a declining market.

The Fulcrum Diversified Absolute Return Fund is distributed by Quasar Distributors, LLC.

Performance Summary (Unaudited)

June 30, 2022

Comparison of a Hypothetical \$1,000,000 Investment in the Fulcrum Diversified Absolute Return Fund - Institutional Class Barclays 3-month USD LIBOR Cash Index and BofA Merrill Lynch 3-Month US Treasury Bill Index

Investment Returns For the periods ended June 30, 2022

	One Year	3 Year*	<u> 5 Year *</u>	Since Inception*
Fulcrum Diversified Absolute Return Fund				
Institutional Class **	-0.09%	6.25%	4.53%	2.91%
Super Institutional Class **	0.02%	6.34%	4.61%	2.96%
Barclays 3-month USD LIBOR Cash Index ***	0.38%	1.00%	1.56%	1.41%
BofA Merrill Lynch 3-Month US Treasury Bill Index ^	0.17%	0.63%	1.11%	0.90%

^{*} Average annualized returns.

As of the prospectus dated October 31, 2021, the gross and annual fund operating expense ratio for the Institutional Share Class is 1.32% and for the Super-Institutional Class is 1.29%.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-855-538-5278 visiting the Fund's website at https://www.fulcrumassetfunds.com.

^{**} Inception date on July 31, 2015.

^{***} The Barclays 3 month USD Libor Cash Index reflects the return of an assumed investment at the daily 3 month USD Libor rate.

[^] The BofA Merrill Lynch 3-Month US Treasury Bill Index has replaced the Barclays 3-month USD LIBOR Cash Index as the Fund's primary benchmark due to the use of LIBOR as a reference rate being phased-out.

Expense Example (Unaudited) June 30, 2022

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs; and (2) ongoing costs, including management fees and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from January 1, 2022 to June 30, 2022 (the "period").

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 equals 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period" to estimate the expenses you paid on your account during the period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance (5% return before expenses)" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as redemption fees. Therefore, the information under the heading "Hypothetical Performance (5% Return Before Expenses)" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Expenses Paid During the Period

	Beginning Account Value	Ending Account Value	Annualized Expense Ratio	Expenses Paid During the Period (1)
Institutional Class				
Actual Fund Return	\$1,000.00	\$1,018.90	1.13%	\$5.66
Hypothetical 5% Return	\$1,000.00	\$1,019.19	1.13%	\$5.66
Super Institutional Class				
Actual Fund Return	\$1,000.00	\$1,020.00	1.02%	\$5.11
Hypothetical 5% Return	\$1,000.00	\$1,019.74	1.02%	\$5.11

⁽¹⁾ Expenses are equal to the Fund's annualized expense ratio as indicated, multiplied by the average account value over the period, multiplied by 181/365 (to reflect the "period").

Consolidated Allocation of Portfolio Holdings (Unaudited)

By Market Exposure of Cash settled instruments, Futures, and Options

June 30, 2022

^{*} Diversifying Strategies – are comprised of systematically implemented exposure using futures to various asset classes which are included for diversification purposes and could include equities, fixed income, currencies and commodities.

¹ Individual risk by asset class - is calculated by the current category weight in the portfolio multiplied by the standard deviation of portfolio holdings in that category. Data used is as of June 30, 2022. Standalone risk is measured for each category independently of other categories and does not take into account their potential offsetting effect. Therefore, the sum of standalone risk for all categories will exceed the risk of the entire portfolio. Standalone risk indicates to the investor the risk of holding a category by itself.

Sum of Individual Risk

² Individual Risk percentages may not total to Sum of Individual Volatility Risk due to rounding.

Notes to Consolidated Financial Statements June 30, 2022

Note 1 – Organization

Fulcrum Diversified Absolute Return Fund (the "Fund") is a diversified series of Trust for Advised Portfolios (the "Trust"). The Trust, a Delaware Statutory Trust, is registered under the Investment Company Act of 1940, as amended (the "1940 Act") as an open-end investment management company. Fulcrum Asset Management LLP (the "Adviser") serves as the investment manager to the Fund.

The investment objective of the Fund is to achieve long-term absolute returns. The inception date of the Fund was July 31, 2015. The Fund currently offers two classes of shares, Institutional Class and Super Institutional Class. Each class of shares represents an equal interest in the Fund, except the difference of class specific expenses, which reflects the difference in the range of services provided to each class. Income, expenses (other than class specific), and realized and unrealized gains and losses on investments are allocated daily to each class based on relative net assets.

The Fund may issue an unlimited number of shares of beneficial interest, with no par value. All shares of the Fund have equal rights and privileges.

In order to achieve its investment objective, the Fund invests up to 25% of its total assets (measured at the time of purchase) in a wholly-owned and controlled Cayman Islands subsidiary, the Fulcrum Diversified Absolute Return Cayman Fund Ltd. (the "Subsidiary"). The Subsidiary acts as an investment vehicle that enables the Fund to gain exposure to certain investments consistent with its investment objectives and policies specified in the Prospectus and Statement of Additional Information. At June 30, 2022 the Fund's investment in the Subsidiary represented 7.32% of the Fund's net assets. The results from operations of the Subsidiary were as follows:

Net investment loss	\$ (28,483)
Net realized gain	1,713,810
Net change in unrealized appreciation (depreciation)	 (2,267,841)
Net decrease in net assets resulting from Operations	\$ (582,514)

The consolidated financial statements of the Fund include the financial statements of the Subsidiary.

All intercompany accounts and transactions have been eliminated in consolidation. Because the Fund may invest a substantial portion of its assets in the Subsidiary, the Fund may be considered to be indirectly investing in said investments. As such, references to the Fund may also include its Subsidiary. When viewed on a consolidated basis, the Subsidiary will be subject to the same investment restrictions and limitations and follow the same compliance policies and procedures as the Fund. The Fund and its Subsidiary are each a "commodity pool" under the U.S. Commodity Exchange Act, and the Adviser is a "commodity pool operator" registered with and regulated by the Commodity Futures Trading Commission ("CFTC"). As a result, additional CFTC-mandated disclosure, reporting and recordkeeping obligations apply with respect to the Fund and its Subsidiary under CFTC and the U.S. Securities and Exchange Commission (the "SEC") harmonized regulations.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

At June 30, 2022, the investment held in the Subsidiary was \$11,634,673; there was \$(776,565) of unrealized depreciation in the Subsidiary. The Subsidiary holds cash and cash equivalents as collateral on open contracts. There were 316 futures contracts and 1,006 options contracts as detailed in the Consolidated Schedule of Investments.

Note 2 – Significant Accounting Policies

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. These policies are in conformity with accounting principles generally accepted in the United States of America ("GAAP") for investment companies. The Fund is considered an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board Accounting Standards Codification Topic 946.

(a) Securities Valuation

The Fund follows a fair value hierarchy that distinguishes between market data obtained from independent sources (observable inputs) and the Fund's own market assumptions (unobservable inputs). The inputs or methodology used in determining the value of the Fund's investments are not necessarily an indication of the risk associated with investing in those securities.

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized into three broad categories as defined below:

- Level 1 Quoted prices in active markets for identical securities. An active market for a security is a market in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value.
- Level 2 Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.
- Level 3 Significant unobservable inputs, including the Fund's own assumptions in determining fair value of investments

Equity Securities that are traded on a national securities exchange are stated at the last reported sales price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy.

Debt securities, including corporate, convertible, U.S. government agencies, U.S. treasury obligations, and sovereign issues, are normally valued by pricing service providers that use broker dealer quotations or valuation estimates from their internal pricing models. The service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risk/spreads and default rates. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

Derivative instruments, such as foreign currency contracts, options contracts, futures, or swap agreements, derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. Exchange traded derivatives are normally valued at the daily settlement price or composite mean depending on the product type. When these valuations are used, the positions are classified as Level 1 in the fair value hierarchy. Over-the-counter derivatives are valued by an independent pricing service using a series of techniques, including simulation pricing models. The pricing models use various inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, curves, implied volatility and exchange rates. When prices are determined by the pricing agent, positions are classified as Level 2 of the fair value hierarchy.

Dispersion warrants are valued using prices provided by the respective counterparty and are reviewed by the Adviser. These valuations are classified a Level 2 of the fair value hierarchy.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the fair values of the Fund's consolidated investments in each category investment type as of June 30, 2022:

Description	Qu	oted Prices Level 1	Other Significant Observable Inputs Level 2	Unobs Inj	ificant ervable puts vel 3	Total

^{**} Forward Currency Contracts, Total Return Swaps, Interest Rate Swaps, Inflation Swaps, Credit Default Swaps and Futures Contracts are valued at the unrealized appreciation (depreciation) of the instrument.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

(b) Derivatives

The Fund invests in certain derivative instruments, as detailed below, to meet its investment objectives. Derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset, reference rate, or index, and may relate to equity securities, fixed income securities, interest rates, commodities, or currency exchange rates and related indexes. The Fund may also use these derivatives to modify or hedge the Fund's exposure to a particular investment market related risk, as well as to manage the volatility of the Fund. Additionally, the Fund may use derivatives to manage cash. By investing in derivatives, the Fund attempts to achieve the economic equivalence it would achieve if it were to invest directly in the underlying security. Derivatives may involve various risks, including the potential inability of the counterparty to fulfill its obligation under the terms of the contract, the potential for an illiquid secondary market (making it difficult for the Fund to sell at favorable prices) and the potential for market movements which may expose the Fund to gains or losses in excess of the amount shown in the Consolidated Statement of Assets and Liabilities.

Specific types of derivative instruments used by the Fund for the year ended June 30, 2022, include purchased options and warrants; written options; forward currency and futures contracts; and interest rate, inflation, credit default and total return swaps. All open derivative positions are listed on the Consolidated Schedule of Investments.

Options Contracts – The Fund may write call and put options on securities, derivative instruments, or currencies. When the Fund writes a call or put option, an amount equal to the premium received is recorded as a liability and subsequently marked-to-market to reflect the current value of the option written. These liabilities are reflected as written options outstanding in the Consolidated Statement of Assets and Liabilities. Premiums received from writing options which expire are treated as realized gains. Written options which are closed or exercised will result in a gain if the closing price of the underlying security is lower than the premium received. The Fund, as a writer of an option, has no control over whether the underlying security may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of said underlying security. The risk exists that the Fund may not be able to enter into a closing transaction because of an illiquid market.

The Fund may also purchase call and put options. The Fund pays a premium which is included in the Consolidated Statement of Assets and Liabilities as an investment and subsequently marked-to-market to reflect the current value of the option. Premiums paid for purchasing options which expire are treated as realized losses. The risk associated with purchasing put and call options is limited to the premium paid. Purchasing options will result in a gain if the closing price of the transaction is higher than the premium paid.

Dispersion Warrants – The Fund makes investments in dispersion warrants. The final payout is calculated based on the volatility of a basket of underlying stocks compared to an established strike value for each constituent relative to the actual volatility of the overall index compared to an index strike value. The Fund pays a premium for each warrant. The Fund will recognize a gain if the dispersion calculation results in a payment greater than the premium paid. Otherwise, the Fund will recognize a realized loss at maturity. The amount of loss is limited to the amount of premium paid.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

Forward and Futures Contracts – A forward contract involves a negotiated obligation to purchase or sell a specific asset at a future date, at a price set at the time of the contract. A futures contract is a standardized forward contract to buy or sell a financial instrument or commodity at a predetermined price in the future. The primary risks associated with the use of these contracts are: (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract, (b) possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired, (c) losses caused by unanticipated market movements, which are potentially unlimited, (d) the Adviser's inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors, (e) the possibility that the counterparty will default in the performance of its obligations, and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, thus the Fund may have to sell securities at a time when it may be disadvantageous to do so.

Swap Contracts – The Fund invests in total return swaps, in which payments made by the Fund or the counterparty are based on the total return of a particular reference asset or portfolio of assets (such as a single security, combination or "basket" of securities, or an index). The value of the Fund's swap positions increases or decreases depending on the changes in value of the underlying rates, currency values, volatility or other indices or measures.

The Fund enters into interest rate swaps. The two parties to the swap exchange the right to receive floating interest payments versus fixed interest payments. The value of an interest rate swap will change based on the spread between the rates.

The Fund invests in inflation swaps. The two parties exchange the return based on an inflation index for a fixed coupon payment. The value of the Fund's position changes based on the change in the underlying inflation index value.

The Fund enters into credit default swap agreements, credit default index swap agreements and similar agreements as a protection "seller" or as a "buyer" of credit protection. The credit default swap agreement or similar instruments may have as reference obligations one or more securities that are not held by the Fund. The protection "buyer" in a credit default swap agreement is generally obligated to pay the protection "seller" a periodic stream of payments over the term of the agreement, provided generally that no credit event on a reference obligation has occurred. In addition, at the inception of the agreement, the protection "buyer" may receive or be obligated to pay an additional up-front amount depending on the current market value of the contract. If a credit event occurs, an auction process is used to determine the "recovery value" of the contract. The seller then must pay the buyer the "par value" (full notional value) of the swap contract minus the "recovery value" as determined by the auction process. For credit default index swaps, the settlement payment for a constituent's credit event is scaled down to the weighting in the index.

As a seller of protection, the Fund generally receives a fixed rate of income throughout the term of the swap provided that there is no credit event. In addition, at the inception of the agreement, the Fund may receive or be obligated to pay an additional up-front amount depending on the current market value of the contract. If a credit event occurs, the Fund will be generally obligated to pay the buyer the "par value" (full notional value) of the swap contract minus the "recovery value" as determined by the auction process. Credit default swaps could result in losses if the Adviser does not correctly evaluate the creditworthiness

Notes to Consolidated Financial Statements (Continued) June 30, 2022

of the underlying instrument on which the credit default swap is based. Additionally, if the Fund is a seller of a credit default swap and a credit event occurs, the Fund could suffer significant losses.

Changes in the value of swaps are recorded as unrealized appreciation (depreciation). Unrealized gains are reported as an asset and unrealized losses are reported as a liability. The change in value of swaps, including accruals of interest to be paid or received is reported as unrealized gains or losses. Gains or losses are realized upon termination of the contracts. The risk of loss on a swap contract may exceed the amount recorded as an asset or liability on the Consolidated Statement of Assets and Liabilities. The notional amount of a swap contract is the reference amount pursuant to which the counterparties make payments. Risks associated with swap contracts include changes in the returns of underlying instruments, failure of the counterparties to perform under a contract's terms and the possible lack of liquidity with respect to the contracts.

Derivative Investment Holdings Categorized by Risk Exposure — The following table sets forth the fair value and the location in the Consolidated Statement of Assets and Liabilities of the Fund's derivative contracts by primary risk exposure as of June 30, 2022:

Purchased correlation options	Notional Amount	\$ 425,534
Written options	Contracts	(2,464)
Written currency options	Notional Amount	\$ (84,480)

^{*} Includes inflation swaps

The Fund is subject to various Master Netting Arrangements, which govern the terms of certain transactions with select counterparties. The Master Netting Arrangements allow the Fund to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single agreement with a counterparty. The Master Netting Arrangements also specify collateral posting arrangements at pre-arranged exposure levels. Under the Master Netting Arrangements, collateral is routinely transferred if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant Master Netting Arrangement with a counterparty in a given account exceeds a specified threshold depending on the counterparty and the type of Master Netting Arrangement.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

The following tables set forth the Fund's net exposure for derivative instruments that are subject to enforceable master netting arrangements or similar agreements as of June 30, 2022:

		Gross Amounts	Net Amounts	Gross Amounts n Consolidated State

⁽¹⁾ Any over-collateralization of total financial instruments or cash is not shown.

⁽²⁾ Reflects the cumulative unrealized appreciation (depreciation) of futures contracts as reported in the Fund's Consolidated Schedule of Investments.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

(c) Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

(d) Security Transactions and Investment Income

The Fund records security transactions based on trade date. The Fund determines the gain or loss realized from investment transactions by comparing the original cost of the specifically identified security lot sold with the net sales proceeds. Dividend income is recognized on the ex-dividend date, and interest income is recognized on an accrual basis. Discounts and premiums on securities purchased are amortized over the lives of the respective securities using the effective yield method. Withholding taxes on foreign dividends have been provided for in accordance with the Fund's understanding of the applicable country's tax rules and rates.

(e) Foreign currency translation

Investment securities and other assets and liabilities in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts based upon prevailing exchange rates on the respective dates of such transactions.

The Fund does not isolate that portion of the results of operations resulting from fluctuations in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Net realized foreign exchange gains or losses arise from sales of foreign currencies, including gains and losses on forward foreign currency contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the values of assets and liabilities, other than investments in securities, on the date of valuation, resulting from changes in exchange rates.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. dollar denominated transactions as a result of, among other factors, the possibility of lower levels of governmental supervision and regulation of foreign securities markets and the possibility of political or economic instability. As of June 30, 2022, the Fund held foreign currency.

(f) Distributions to Shareholders

The Fund records distributions to shareholders, which are determined in accordance with income tax regulations, on the ex-dividend date. Distributions of net investment income and net realized gains from investment transactions, if any, will be distributed to shareholders annually. The Fund may periodically

Notes to Consolidated Financial Statements (Continued) June 30, 2022

make reclassifications among certain income and capital gains distributions determined in accordance with federal tax regulations, which may differ from GAAP. These reclassifications are due to differences in the recognition of income, expense and gain (loss) items for financial statement and tax purposes.

(g) Federal Income Taxes

The Fund has elected to be taxed as a Regulated Investment Company ("RIC") under the U.S. Internal Revenue Code of 1986, as amended, and intends to maintain this qualification and to distribute substantially all of the net taxable income to its shareholders. Therefore no provision is made for federal income taxes. Due to the timing of dividend distributions and the differences in accounting for income and realized gains and losses for financial statement and federal income tax purpose, the fiscal year in which amounts are distributed may differ from the year in which the income and realized gains and losses are recorded by the Fund.

Management has analyzed the Fund's tax positions taken on income tax returns for all open tax years (prior three fiscal years) and has concluded that as of June 30, 2022, no provision for income tax is required in the Fund's financial statements. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue. The Fund has no examination in progress and are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

(h) Restricted Cash & Deposits with Broker

At June 30, 2022, the Fund held restricted cash in connection with investments with certain derivative securities. Restricted cash is held in a segregated account with the Fund's custodian and is reflected on the Consolidated Statement of Assets and Liabilities as cash collateral for derivative instruments. On June 30, 2022, the Fund had pledged the following amounts as collateral for open currency contracts, options, futures and swap contracts:

Counterparty	Amount Pledged (1)		Depo	osits with Brokers
Barclays	\$	-	\$	880,221
Citibank, N.A.		1,230,000		-
Goldman Sachs		860,000		-
J.P. Morgan Chase		2,235,084		892,333
Morgan Stanley		17,850,000		20,996,960
Total	\$	22,175,084	\$	22,769,514

⁽¹⁾ Excludes non-pledged cash or collateral held by broker.

(i) Cash - Concentration in Uninsured Cash

For cash management purposes the Fund may concentrate cash with the Fund's custodian. This typically results in cash balances exceeding the Federal Deposit Insurance Corporation ("FDIC") insurance limits. As of June 30, 2022, the Fund held \$9,987,714 as cash reserves at U.S. Bank, N.A. ("U.S. Bank") that exceeded the FDIC insurance limit.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

Note 3 – Investment Management Agreement and Other Related Party Transactions

The Trust has an agreement with the Adviser to furnish investment advisory services to the Fund. Under the terms of this agreement, the Fund will pay the Adviser a monthly fee based on the Fund's average daily net assets at an annual rate of 0.90%. Pursuant to a contractual fee waiver and reimbursement agreement, the Adviser will reimburse the Fund for expenses in excess of 1.05%, of average daily net assets for both the Institutional and Super Institutional Classes, excluding any shareholder servicing fees pursuant to a Shareholder Servicing Plan, any front-end or contingent deferred loads, taxes, leverage interest, brokerage commissions, acquired fund fees and expenses, expenses incurred in connection with any merger or reorganization, portfolio transaction expenses, interest expense and dividends paid on short sales or extraordinary expenses such as litigation.

The Adviser is permitted to recapture amounts waived and/or reimbursed to a class within three years if the class's total annual operating expenses have fallen to a level below the expense limitation ("expense cap") in effect at the time the fees were earned or the expenses incurred. In no case will the Adviser recapture any amount that would result, on any particular business day of the Fund, in the class's total annual operating expenses exceeding the expense cap or any other lower limit then in effect.

At June 30, 2022, the amounts reimbursed by the Adviser and subject to potential recapture by year were as follows:

Amount	Expiration
\$ 181,991	June 30, 2023
244,854	June 30, 2024
323,321	June 30, 2025
\$ 750,166	

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services ("Fund Services"), serves as the Fund's administrator fund accountant and transfer agent. The officers of the Trust are employees of Fund Services. U.S. Bank serves as the Fund's custodian and provides compliance services to the Fund. For the year ended June 30, 2022, the Fund incurred the following expenses for administration, compliance, custody and transfer agency fees:

Administration	\$ 200,505
Compliance Services	\$ 12,637
Custody	\$ 48,376
Transfer Agency	\$ 69,535

Notes to Consolidated Financial Statements (Continued) June 30, 2022

At June 30, 2022, the Fund had payables due to Fund Services for administration, compliance, custody, transfer agency fees to U.S. Bank in the following amounts:

Administration	\$ 35,738
Compliance Services	\$ 2,131
Custody	\$ 9,692
Transfer Agency	\$ 12,932

The above payable amounts are included in other accrued expenses in the Consolidated Statement of Assets and Liabilities.

The Independent Trustees were paid \$14,722 for their services during the year ended June 30, 2022. The Fund pays no compensation to the Interested Trustee or officers of the Trust.

Note 4 – Distribution Plan

Third party distribution and servicing expenses may be paid directly by the Fund or through the Investment Adviser in its administrative role for purposes of facilitating and monitoring payments under the Plan.

Quasar Distributors, LLC ("Quasar" or the "Distributor") acts as the Fund's distributor and principal underwriter in a continuous public offering of the Fund's shares and is paid for its services by the Investment Adviser out of the fees received under the Plan and may be paid out of the Investment Adviser's own resources.

Note 5 – Portfolio Securities Transactions

The cost of purchases and proceeds from sales and maturities of long-term securities for the year ended June 30, 2022, were as follows:

Purchases	\$ 178,000,297
Sales	\$ 130,148,742

Notes to Consolidated Financial Statements (Continued) June 30, 2022

Note 6 – Federal Income Tax Information

At June 30, 2022, the components of distributable earnings for income tax purposes were as follows:

	Investments	Written Options	Foreign Currencies	Forward Currency Contracts	Futures Contracts	Swap Contracts	Total
Tax cost of Investments	\$ 102,940,930	\$(2,059,610)	\$ 1,506,938	\$ -	\$ 279,372	\$ 667,883	\$ 103,335,513
Unrealized Appreciation	2,001,359	599,966	20,728	204,637	333,455	-	3,160,145
Unrealized Depreciation	(3,855,129)		(3,650)	(12,615)	(862,122)	-	(4,733,516)
Net unrealized							
appreciation (depreciation)	(1,853,770)	599,966	17,078	192,022	(528,667)		(1,573,371)
Undistributed Long Term							
Gain	86,604	-	-	-	-	-	86,604
Other accumulated losses	(959,395)	-	-	-	-	-	(959,395)
Total accumulated losses	\$ (2,726,561)	\$ 599,966	\$ 17,078	\$ 192,022	\$(528,667)	\$ -	\$ (2,446,162)
103363	ψ (2,720,301)	ψ 577,700	Ψ 17,076	ψ 172,022	Ψ(320,007)	ψ -	Ψ (2,170,102)

The difference between book basis and tax basis unrealized appreciation/depreciation is attributable in part to the tax deferral of losses on wash sales.

GAAP requires that certain components of net assets be reclassified between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share. For the year ended June 30, 2022, permanent differences in book and tax accounting have been reclassified to capital, and distributable earnings as follows:

Distributable Earnings	Paid In Capital
\$ (2,186,304)	\$ 2,186,304

The tax character of distributions paid during the year ended June 30, 2022, and June 30, 2021 were as follows:

	Y ear ended		Y	Y ear ended	
Distributions Paid From:	June 30, 2022		Jur	June 30, 2021	
Ordinary Income	\$	7,513,243	\$	7,747,458	
Long-Term Capital Gains		250		1,388,354	
Total Distributions Paid	\$	7,513,493	\$	9,135,812	

Notes to Consolidated Financial Statements (Continued) June 30, 2022

The Fund is required, in order to meet certain excise tax requirements, to measure and distribute annually, net capital gains realized during the twelve month period ending October 31. In connection with this requirement, the Fund is permitted, for tax purposes, to defer into its next fiscal year any net capital losses incurred from November 1 through the end of the fiscal year. Late year losses incurred after December 31 within the fiscal year are deemed to arise on the first business day of the following fiscal year for tax purposes. At June 30, 2022, the Fund had no post-October losses and \$957,570 in late-year losses.

At June 30, 2022, the Fund had no capital loss carryforwards, which reduce the Fund's taxable income arising from future net realized gains on investments, if any, to the extent permitted by the Internal Revenue Code, and thus will reduce the amount of distributions to shareholders which would otherwise be necessary to relieve the Fund of any liability for federal tax.

Note 7 – Commitments and Contingencies

In the normal course of business, the Fund enters into contracts that provide general indemnifications by the Fund to the counterparty to the contract. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against each Fund and, therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote.

Note 8 – Subsequent Events

In accordance with GAAP, management has evaluated the need for disclosures and/or adjustments resulting from subsequent events through the date of issuance of these financial statements.

Subsequent to the fiscal year end, it was identified that a forward currency contract had been incorrectly recorded in the Fund's records and overvalued for a period of time including the date of the report. The correction of the error resulted in a reduction of about \$0.06 per share for each class of the Fund as of June 30, 2022. The financial statements reflect the correct value of the forward contract, adjustments to the capital transactions, and a receivable from the Fund Administrator to compensate for losses to the Fund caused by the error.

Management has concluded there are no additional matters, other than those noted above, requiring recognition or disclosure.

Note 9 – COVID-19 Risk

The global outbreak of COVID-19 (commonly referred to as "coronavirus") has disrupted economic markets and the prolonged economic impact is uncertain. The ultimate economic fallout from the pandemic, and the long-term impact on economies, markets, industries and individual issuers, are not known. The operational and financial performance of the issuers of securities in which the Fund invest depends on future developments, including the duration and spread of the outbreak, and such uncertainty may in turn adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance.

Notes to Consolidated Financial Statements (Continued) June 30, 2022

Note 10 – New Accounting Pronouncement

ASU 2020-04. In March 2020, FASB issued ASU 2020-04, Reference Rate Reform: Facilitation of the Effects of Reference Rate Reform on Financial Reporting. The main objective of the new guidance is to provide relief to companies that will be impacted by the expected change in benchmark interest rates at the end of 2021, when participating banks will no longer be required to submit London Interbank Offered Rate ("LIBOR") quotes by the UK Financial Conduct Authority. The new guidance allows companies to, provided the only change to existing contracts are a change to an approved benchmark interest rate, account for modifications as a continuance of the existing contract without additional analysis. In addition, derivative contracts that qualified for hedge accounting prior to modification, will be allowed to continue to receive such treatment, even if critical terms change due to a change in the benchmark interest rate. For new and existing contracts, the Fund may elect to apply the amendments as of March 12, 2020 through December 31, 2022. Management is currently assessing the impact of the ASU's adoption to the Fund's consolidated financial statements and various filings.

Rule 2a-5. In December 2020, the SEC adopted a new rule providing a framework for fund valuation practices ("Rule 2a-5"). Rule 2a-5 establishes requirements for determining fair value in good faith for purposes of the 1940 Act. Rule 2a-5 will permit fund boards to designate certain parties to perform fair value determinations, subject to board oversight and certain other conditions. Rule 2a-5 also defines when market quotations are "readily available" for purposes of the 1940 Act and the threshold for determining whether a fund must fair value a security. In connection with Rule 2a-5, the SEC also adopted related recordkeeping requirements and is rescinding previously issued guidance, including with respect to the role of a board in determining fair value and the accounting and auditing of fund investments. The Fund will be required to comply with the rules by September 8, 2022.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees of Trust for Advised Portfolios and the Shareholders of Fulcrum Diversified Absolute Return Fund

Opinion on the Financial Statements

We have audited the accompanying consolidated statement of assets and liabilities of Fulcrum Diversified Absolute Return Fund, a series of shares of beneficial interest in Trust for Advised Portfolios (the "Fund"), including the consolidated schedule of investments, as of June 30, 2022, and the related consolidated statement of operations for the year then ended, the consolidated statements of changes in net assets for each of the years in the two-year period then ended and the consolidated financial highlights for each of the years in the five-year period then ended, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of June 30, 2022, and the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended and its financial highlights for each of the years in the five-year period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Fund in accordance with the U.S. federal securities law and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of June 30, 2022 by correspondence with the custodian, brokers, or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

BBD, LLP

BBA, Up

We have served as the auditor of one or more of the Funds in the Trust for Advised Portfolios since 2010.

Additional Information June 30, 2022

Quarterly Portfolio Schedule

The Fund files its complete schedule of portfolio holdings for the first and third quarters of each fiscal year with the Securities and Exchange Commission (SEC) on Part F of Form N-PORT. The Fund's Form N-PORT is available without charge by visiting the SEC's Web site at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling 1-800-SEC-0330.

Proxy Voting

You may obtain a description of the Fund's proxy voting policy and voting records, without charge, upon request by contacting the Fund directly at 1-855-538-5278 or on the EDGAR Database on the SEC's website at www.sec.gov. The Fund files its proxy voting records annually as of June 30, with the SEC on Form N-PX. The Fund's Form N-PX is available without charge by visiting the SEC's website at www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling 1-800-SEC-0330.

Tax Information

For the fiscal year ended June 30, 2022, certain dividends paid by the Fund may be subject to a maximum tax rate of 20%, as provided for by the Jobs and Growth Tax Relief Reconciliation Act of 2003. The percentage of dividends declared from ordinary income designated as qualified dividend income was 0.00%.

For corporate shareholders, the percent of ordinary income distributions qualifying for the corporate dividends received deduction for the fiscal year ended June 30, 2022 was 0.00%.

The percentage of taxable ordinary income distributions that are designated as short-term capital gain distributions under Internal Revenue Section 871(k)(2)(C) for the Fund was 0.00%.

Statement Regarding Liquidity Risk Management Program

The Fund has adopted a liquidity risk management program. The Funds' Board has designated a Liquidity Risk Committee ("Committee") of the Adviser to serve as the administrator of the program. The Committee conducts the day-to-day operation of the program pursuant to policies and procedures administered by the Committee.

Under the program, the Committee manages the Fund's liquidity risk, which is the risk that a Fund could not meet shareholder redemption requests without significant dilution of remaining shareholders' interests in a Fund. This risk is managed by monitoring the degree of liquidity of the Fund's investments, limiting the amount of the Fund's illiquid investments, and utilizing various risk management tools and facilities available to each Fund for meeting shareholder redemptions, among other means.

The Funds' Board reviewed a report prepared by the Committee regarding the operation and effectiveness of the program for the period January 1, 2021 through December 31, 2021. No liquidity events impacting either of the Funds were noted in the report. In addition, the Committee provided its assessment that the program had been effective in managing each Fund's liquidity risk.

- (1) Each Trustee serves an indefinite term; however, under the terms of the Board's retirement policy, a Trustee shall retire at the end of the calendar year in which he or she reaches the age of 75 (this policy does not apply to any Trustee serving at the time the policy was adopted). Each officer serves an indefinite term until the election of a successor.
- (2) The Trust is comprised of numerous series managed by unaffiliated investment advisers. The term "Fund Complex" applies only to the Fund. The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor do they share the same investment advisor with any other series.
- (3) "Other Directorships Held" includes only directorships of companies required to register or file reports with the SEC under the Securities Exchange Act of 1934, as amended, (that is, "public companies") or other investment companies registered under the 1940 Act.
- (4) The Trustees of the Trust who are not "interested persons" of the Trust as defined under the 1940 Act ("Independent Trustees").
- (5) Mr. Kashmerick is deemed to be an "interested person" of the Trust as defined by the 1940 Act. Mr. Kashmerick is an interested Trustee of the Trust by virtue of the fact that he is an interested person of U.S. Bancorp Fund Services, LLC, the Fund's administrator, fund accountant, and transfer agent.

The Fund's Statement of Additional Information ("SAI") includes information about the Fund's Trustees and is available without charge, upon request, by calling 1-855-538-5278.

PRIVACY NOTICE

The Fund collects non-public information about you from the following sources:

- Information we receive about you on applications or other forms;
- Information you give us orally; and/or
- Information about your transactions with us or others.

We do not disclose any non-public personal information about our customers or former customers without the customer's authorization, except as permitted by law or in response to inquiries from governmental authorities. We may share information with affiliated and unaffiliated third parties with whom we have contracts for servicing the Fund. We will provide unaffiliated third parties with only the information necessary to carry out their assigned responsibilities. We maintain physical, electronic and procedural safeguards to guard your non-public personal information and require third parties to treat your personal information with the same high degree of confidentiality.

In the event that you hold shares of the Fund through a financial intermediary, including, but not limited to, a broker-dealer, bank, or trust company, the privacy policy of your financial intermediary would govern how your non-public personal information would be shared by those entities with unaffiliated third parties.
