## THE FUND

---

The Fulcrum Diversified Absolute Fund is a diversified series of Northern Lights Fund Trust IV, a Delaware statutory trust organized on June 2, 2015 (the “Trust”). The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the “Board”).

The Fund may issue an unlimited number of shares of beneficial interest. All shares have equal rights and privileges. Each share of the Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of the Fund is entitled to participate equally with other shares (i) in dividends and distributions declared by the Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Fund are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

The Fund’s investment objective, restrictions and policies are more fully described here and in the Prospectus. The Board may add classes to and reclassify the shares of the Fund, start other series and offer shares of a new fund under the Trust at any time.

The Fund offers three classes of shares: Super Institutional Class, Institutional Class and Advisor Class shares. Each share class represents an interest in the same assets of the Fund, has the same rights and is identical in all material respects except that (i) each class of shares may be subject to different (or no) sales loads; (ii) each class of shares may bear different (or no) distribution fees; (iii) each class of shares may have different shareholder features, such as minimum investment amounts; (iv) certain other class-specific expenses will be borne solely by the class to which such expenses are attributable, including transfer agent fees attributable to a specific class of shares, printing and postage expenses related to preparing and distributing materials to current shareholders of a specific class, registration fees paid by a specific class of shares, the expenses of administrative personnel and services required to support the shareholders of a specific class, litigation or other legal expenses relating to a class of shares, Board fees or expenses paid as a result of issues relating to a specific class of shares and accounting fees and expenses relating to a specific class of shares and (v) each class has exclusive voting rights with respect to matters relating to its own distribution arrangements. The Board may classify and reclassify the shares of the Fund into additional classes of shares at a future date.

Under the Trust’s Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the “1940 Act”) and the rules and regulations promulgated thereunder and the Delaware Statutory Trust Act. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. The Delaware Statutory Trust Act does not require annual shareholders’ meetings. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

## TYPE OF INVESTMENTS

---

The investment objective of the Fund and the descriptions of the Fund’s principal investment strategies and risks are set forth under “Investment Objective,” “Principal Investment Strategies,” and “Principal Investment Risks” in the Prospectus. The Fund’s investment objective is not fundamental and may be changed by the Board without the approval of a majority of the outstanding voting securities of the Fund.

The following pages contain more detailed information about the types of instruments in which the Fund may invest and strategies Fulcrum Asset Management, LLP (the “Adviser”) employs in pursuit of the Fund’s investment objective and a summary of related risks.

## **Investment in the Subsidiary**

The Fund may invest up to 25% of its assets in a wholly-owned and controlled Cayman Islands subsidiary (“Subsidiary”). It is expected that the Subsidiary will invest primarily in commodity futures and options and other commodity-linked derivative instruments. In addition, the Subsidiary may also invest in financial futures, option and swap contracts, fixed income securities and structured notes, including those that are not registered pursuant to the Investment Company Act of 1940, as amended (the “1940 Act”), and other investments intended to serve as margin or collateral for the Subsidiary’s derivatives positions. As a result, the Fund may be considered to be investing indirectly in these investments through its Subsidiary. For that reason, and for the sake of convenience, references in this SAI to the Fund may also include the Subsidiary. The Subsidiary’s key financial information is presented with that of the Fund in the form of consolidated financial statements included in the Fund’s annual and semi-annual reports to shareholders. Copies of the reports are provided without charge upon request.

The Subsidiary is a company organized under the laws of the Cayman Islands, whose registered office is located at the offices of Maples and Calder, PO Box 309, Ugland House, Grand Cayman, KY1-1104, Cayman Islands. The Subsidiary’s affairs are overseen by its own board of directors consisting of three directors, one of which is not an interested person of the Subsidiary and the Fund, and therefore, is an independent director.

The Subsidiary has entered into a separate contract with the Adviser for the management of the Subsidiary’s portfolio pursuant to which the Subsidiary pays the Adviser a management fee for its services. The Adviser has contractually agreed to waive the management fee it receives from the Fund in an amount equal to the management fee paid to the Adviser by the Subsidiary. As a result, the Fund’s investment in the Subsidiary will not result in the Fund paying duplicative management fees. The Subsidiary will bear the fees and expenses incurred in connection with the custody, transfer agency, and audit services that it receives, which are specific to the Subsidiary and its operations and not duplicative of services provided to the Fund. The Fund expects that the expenses borne by its Subsidiary will not be material in relation to the value of the Fund’s assets. Please refer to the section in this SAI titled “Distributions and Tax Information” for information about certain tax aspects of the Fund’s investment in the Subsidiary.

The Subsidiary is not registered as an investment company under the 1940 Act, and as a result, the Fund, as the sole shareholder of the Subsidiary, will not have all of the protections offered to investors in registered investment companies. As noted elsewhere in this SAI, however, the Subsidiary has agreed to be subject to certain provisions of the 1940 Act that further investor protection. Most notably, the Subsidiary has agreed to comply with the 1940 Act’s restrictions under Section 17 related to custody and Section 18 related to leverage and borrowing. In addition, because the Fund wholly owns and controls the Subsidiary, and the Fund and the Subsidiary are each managed by the Adviser, it is unlikely that the Subsidiary will take action contrary to the interests of the Fund or the Fund’s shareholders. The Board has oversight responsibility for the investment activities of the Fund, including its investment in the Subsidiary, and the Fund’s role as the sole shareholder of the Subsidiary. Also, in managing the Subsidiary’s portfolio, the Adviser will be subject to the same fundamental and certain other investment restrictions (except for the restriction on the purchase and sale of commodities and commodities contracts applicable to the Fund) and will follow substantially the same compliance policies and procedures as the Fund to the extent they are applicable to the activities of the Subsidiary.

The Commodity Futures Trading Commission (“CFTC”) regulates the trading of commodity interests, including commodity futures contracts, options on commodity futures, and swaps (which includes cash-settled currency forwards and swaps). The Subsidiary and the Fund are considered commodity pools by the CFTC subject to compliance with applicable provisions of the Commodity Exchange Act and CFTC regulations, and the Adviser is subject to CFTC regulation as the commodity pool operator (the “CPO”) of the Subsidiary and Fund. As a result, the Fund is subject to regulation by both the Securities and Exchange Commission (“SEC”) and the CFTC, which could increase compliance costs of the Subsidiary and the Fund. The Adviser relies on the “substituted compliance” regulatory scheme, whereby compliance with certain SEC rules will result in deemed compliance with certain CFTC rules with respect to disclosure and reporting requirements. As a result, the Adviser’s, Fund’s, and Subsidiary’s newly required compliance with applicable provisions of the Commodity Exchange Act and CFTC regulations has not, to date, materially adversely affected the operation or financial performance of the Fund and the Subsidiary. However, the CFTC’s regulation of registered investment companies is still a developing area of regulation, and as such, the Fund is subject to the risk that new regulations adopted by the CFTC in the future may

adversely affect the operations and financial performance of the Fund and the Subsidiary and ultimately, the ability of each to achieve their respective investment objectives. If the Fund or the Subsidiary was to experience difficulty in implementing their respective investment strategies or achieving their respective investment objectives, the Board may determine to reorganize or close the Fund and/or the Subsidiary or to materially change the Fund's investment objective and strategies.

Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary are organized, could result in the inability of the Fund and/or the Subsidiary to operate as described in this SAI and could negatively affect the Fund and their shareholders. For example, the Cayman Islands do not currently impose any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax on the Subsidiary. If Cayman Islands law changes such that the Subsidiary must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

### **Diversification**

The Fund is diversified under applicable federal securities laws. This means that as to 75% of its total assets (1) no more than 5% may be invested in the securities of a single issuer, and (2) it may not hold more than 10% of the outstanding voting securities of a single issuer. However, the diversification of a mutual fund's holdings is measured at the time the fund purchases a security and if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund's total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers. Accordingly, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities despite qualifying as a diversified fund.

### **Percentage Limitations**

Whenever an investment policy or limitation states a maximum percentage of the Fund's assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund's acquisition or sale of such security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent change in values, net assets or other circumstances will not be considered in determining whether an investment complies with the Fund's investment policies and limitations. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by the Fund, the Fund may receive stock, real estate or other investments that the Fund would not, or could not buy. If this happens the Fund would sell such investments as soon as practicable while trying to maximize the return to its shareholders.

### **Arbitrage**

Employing arbitrage and alternative strategies has the risk that anticipated opportunities do not play out as planned, resulting in potentially reduced returns or losses to the Fund as it unwinds failed trades.

### **Commodities**

Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, embargoes, tariffs and international economic, political and regulatory developments.

### **Counterparty**

The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts (whether a clearing corporation in the case of exchange-traded instruments or another third party in the case of over-the-counter instruments) and other instruments entered into directly by the Fund or held by special purpose or structured vehicles in which the Fund invests. If a counterparty becomes bankrupt or insolvent or otherwise fails to perform its obligations to the Fund due to financial difficulties, the Fund may experience significant losses or delays in obtaining any recovery (including recovery of any collateral it has provided to the counterparty) in a dissolution, assignment for the benefit of creditors, liquidation, winding-up, bankruptcy or other analogous proceeding. In addition, in the event of the bankruptcy or insolvency of a counterparty to a derivative transaction, the derivative

transaction would typically be terminated at its fair market value. If the Fund is owed this fair market value in the termination of the derivative transaction and its claim is unsecured, the Fund will likely be treated as a general creditor of such counterparty, and may not have any claim with respect to any underlying security or asset. The Fund may obtain only a limited recovery, or no recovery, in such circumstances. Counterparty risk with respect to certain exchange-traded and over-the-counter derivatives may be further complicated by U.S. financial reform legislation.

## **Credit**

Credit risk refers to the possibility that the issuer of a security or the issuer of the reference asset of a derivative instrument will not be able to make principal and interest payments when due. Changes in an issuer's credit rating or the market's perception of an issuer's creditworthiness may also affect the value of the Fund's investment in that issuer. Securities rated in the four highest categories by the rating agencies are considered investment grade but they may also have some speculative characteristics. Investment grade ratings do not guarantee that bonds will not lose value.

## **Derivatives**

Some of the instruments in which the Fund may invest may be referred to as "derivatives," because their value "derives" from the value of an underlying asset, reference rate or index. These instruments include futures contracts, forward interest rate contracts, swap agreements and similar instruments. The market value of derivative instruments and securities sometimes may be more volatile than those of other instruments and each type of derivative instrument may have its own special risks.

Some over-the-counter derivative instruments may expose the Fund to the credit risk of its counterparty. In the event the counterparty to such a derivative instrument becomes insolvent, the Fund potentially could lose all or a large portion of its investment in the derivative instrument.

Investing for hedging purposes or to increase the Fund's return may result in certain additional transaction costs that may reduce the Fund's performance. In addition, when used for hedging purposes, no assurance can be given that each derivative position will achieve a close correlation with the security or currency that is the subject of the hedge, or that a particular derivative position will be available when sought by the Adviser. While hedging strategies involving derivatives can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in other Fund investments. Use of derivatives and other forms of leverage by the Fund may require the Fund to liquidate portfolio positions when it may not be advantageous to do so to satisfy its obligations. Increases and decreases in the value of the Fund's portfolio may be magnified when the Fund uses leverage. Certain derivatives may create a risk of loss greater than the amount invested.

*Forward Contracts.* The Fund may invest in forward contracts for investment or hedging purposes. A forward contract involves a negotiated obligation to purchase or sell a specific asset at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Risks associated with forwards include: (i) there may be an imperfect correlation between the movement in prices of forward contracts and the securities underlying them; (ii) there may not be a liquid market for forward contracts; and (iii) forward contracts may be difficult to accurately value. Forward contracts are also subject to credit risk, liquidity risk and leverage risk, each of which is further described elsewhere in this section.

The Fund may engage in non-deliverable forward transactions. A non-deliverable forward transaction is a transaction that represents an agreement between the Fund and a counterparty (usually a commercial bank) to buy or sell a specified (notional) amount of a particular currency at an agreed-upon foreign exchange rate on an agreed-upon future date. The non-deliverable forward transaction position is closed using a fixing rate, as defined by the central bank in the country of the currency being traded, that is generally publicly stated within one or two days prior to the settlement date. Unlike other currency transactions, there is no physical delivery of the currency on the settlement of a non-deliverable forward transaction. Rather, the Fund and the counterparty agree to net the settlement by making a payment in U.S. dollars or another fully convertible currency that represents any differential between the foreign exchange rate agreed upon at the inception of the non-deliverable forward agreement and the actual exchange rate on the agreed upon future date. Thus, the actual gain or loss of a given non-deliverable forward transaction is calculated by multiplying the transaction's notional amount by the difference between the agreed upon

forward exchange rate and the actual exchange rate when the transaction is completed. Under definitions adopted by the CFTC and SEC, many non-deliverable foreign currency forwards are regulated as swaps for certain purposes, including determination of whether such instruments need to be exchange-traded and centrally cleared. These changes are expected to reduce counterparty/credit risk as compared to bi-laterally negotiated contracts.

*Futures Contracts.* The Fund may purchase interest rate and Treasury futures contracts (“financial futures”). Interest rate futures contracts obligate the long or short holder to take or make delivery of a specified quantity of a financial instrument during a specified future period at a specified price. Financial futures are typically cash settled or alternatively, may be physically settled on occasion.

There are special risks associated with entering into financial futures contracts. The skills needed to use financial futures contracts effectively are different from those needed to select the Fund’s fixed income investments. There may be an imperfect correlation between the price movements of financial futures contracts and the price movements of the securities in which the Fund invests. There is also a risk that the Fund will be unable to close a futures position when desired because there is no liquid secondary market for it.

The risk of loss in trading financial futures can be substantial due to the low margin deposits required and the extremely high degree of leverage involved in futures pricing. Relatively small price movements in a financial futures contract could have an immediate and substantial impact, which may be favorable or unfavorable to the Fund. It is possible for a price-related loss to exceed the amount of the Fund’s margin deposit.

Although some financial futures contracts by their terms call for the actual delivery or acquisition of securities at expiration, in most cases the contractual commitment is closed out before expiration. The offsetting of a contractual obligation is accomplished by purchasing (or selling as the case may be) on a commodities or futures exchange an identical financial futures contract calling for delivery in the same month. Such a transaction, if effected through a member of an exchange, cancels the obligation to make or take delivery of the securities. The Fund will incur brokerage fees when it purchases or sells financial futures contracts, and will be required to maintain margin deposits. If a liquid secondary market does not exist when the Fund wishes to close out a financial futures contract, it will not be able to do so and will continue to be required to make daily cash payments of variation margin in the event of adverse price movements. There is no assurance that the Fund will be able to enter into closing transactions.

The Fund may enter into futures contracts on other underlying assets or indexes, including physical commodities and indexes of physical commodities.

At any time prior to expiration of a futures contract, the Fund may seek to close the position by taking an opposite position which would typically operate to terminate the Fund’s position in the futures contract. A final determination of any variation margin is then made, additional cash is required to be paid by or released to the Fund and the Fund realizes a loss or gain.

*Interest Rate or Financial Futures Contracts.* The Fund may invest in interest rate or financial futures contracts. Bond prices are established in both the cash market and the futures market. In the cash market, bonds are purchased and sold with payment for the full purchase price of the bond being made in cash, generally within five business days after the trade. In the futures market, a contract is made to purchase or sell a bond in the future for a set price on a certain date. Historically, the prices for bonds established in the futures markets have generally tended to move in the aggregate in concert with cash market prices, and the prices have maintained fairly predictable relationships.

The sale of an interest rate or financial futures contract by the Fund would create an obligation by the Fund, as seller, to deliver the specific type of financial instrument called for in the contract at a specific future time for a specified price. A futures contract purchased by the Fund would create an obligation by the Fund, as purchaser, to take delivery of the specific type of financial instrument at a specific future time at a specific price. The specific securities delivered or taken, respectively, at settlement date, would not be determined until at or near that date. The determination would be in accordance with the rules of the exchange on which the futures contract sale or purchase was made.

Although interest rate or financial futures contracts by their terms call for actual delivery or acceptance of securities, in most cases the contracts are closed out before the settlement date without delivery of securities. Closing out of a futures contract sale is effected by the Fund’s entering into a futures contract purchase for the same aggregate amount of the specific type of financial instrument and the same delivery date. If the price in the sale exceeds the

price in the offsetting purchase, the Fund is paid the difference and thus realizes a gain. If the offsetting purchase price exceeds the sale price, the Fund pays the difference and realizes a loss. Similarly, the closing out of a futures contract purchase is effected by the Fund's entering into a futures contract sale. If the offsetting sale price exceeds the purchase price, the Fund realizes a gain, and if the purchase price exceeds the offsetting sale price, the Fund realizes a loss.

The exchange typically guarantees performance under contract provisions through a clearing corporation, a nonprofit organization managed by the exchange membership. Domestic interest rate futures contracts may be traded in an auction environment on the floor of an exchange, such as the Chicago Mercantile Exchange. A public market now exists in domestic futures contracts covering various financial instruments including long-term United States Treasury bonds and notes, Government National Mortgage Association ("GNMA"), commonly known as "Ginnie Mae," modified pass-through mortgage-backed securities, three-month United States Treasury bills, and 90-day commercial paper. The Fund may trade in any futures contract for which there exists a public market, including, without limitation, the foregoing instruments. International interest rate futures contracts are traded on various international exchanges. Engaging in futures contracts on international exchanges may involve additional risks, including varying regulatory standards and supervision, fewer laws to protect investors, greater counterparty risk, greater transaction costs, greater volatility, and less liquidity, which could make it difficult for the fund to transact.

*Interest Rate and Total Return Swap Agreements.* The Fund may purchase interest rate swaps which are typically subject to exchange trading and clearing requirements. The Fund may use interest rate swaps to increase or decrease exposure to a particular interest rate or rates, which may result in the Fund experiencing a gain or loss depending on whether the interest rates increased or decreased during the term of the agreement. For temporary, defensive purposes only, the Fund may also engage in total return swaps, in which payments made by the Fund or the counterparty are based on the total return of a particular reference asset or assets (such as a fixed income security, a combination of securities, or an index). The value of the Fund's swap positions would increase or decrease depending on the changes in value of the underlying rates, currency values, volatility or other indices or measures. Caps and floors have an effect similar to buying or writing options. Depending on how they are used, swap agreements may increase or decrease the overall volatility of the Fund's investments and its share price. The Fund's ability to engage in certain swap transactions may be limited by tax considerations.

The Fund's ability to realize a profit from over-the-counter transactions will depend on the ability of the financial institutions with which it enters into the transactions to meet their obligations to the Fund. If a counterparty's creditworthiness declines, the value of the agreement would be likely to decline, potentially resulting in losses. If a default occurs by the other party to such transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction, which may be limited by applicable law in the case of a counterparty's insolvency. Under certain circumstances, suitable transactions may not be available to the Fund, or the Fund may be unable to close out its position under such transactions at the same time, or at the same price, as if it had purchased comparable publicly traded securities. Over-the-counter swaps carry counterparty risks that cannot be fully anticipated. Also, because, in some cases, swap transactions involve a contract between the two parties, such swap investments can be extremely illiquid, as it is uncertain as to whether another counterparty would wish to take assignment of the rights under the swap contract at a price acceptable to the Fund.

The Fund may enter into swap agreements that would calculate the obligations of the parties to the agreement on a "net basis." Consequently, the Fund's current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the segregation or "earmarking" of assets determined to be liquid. A Fund's swap agreements will be segregated in order to ensure that that Fund has assets available to satisfy its obligations under a swap agreement.

*Credit Default Swaps.* The Fund may purchase credit default swaps. A credit default swap is an agreement between the Fund and a counterparty that enables the Fund to buy or sell protection against a credit event related to a particular issuer. One party, acting as a protection buyer, makes periodic payments, which may be based on, among other things, a fixed or floating rate of interest, to the other party, a protection seller, in exchange for a promise by the protection seller to make a payment to the protection buyer if a negative credit event (such as a delinquent payment or default) occurs with respect to a referenced bond or group of bonds. Credit default swaps may also be structured based on the debt of a basket of issuers, rather than a single issuer, and may be customized with respect to the default event that triggers purchase or other factors, or defaults by a particular combination of issuers within the basket, may trigger a payment obligation). As a credit protection seller in a credit default swap contract, the Fund would be required to pay the par (or other agreed-upon) value of a referenced debt obligation to the counterparty following certain negative credit events as to a specified third-party debtor, such as default by a U.S. or non-U.S. corporate issuer on its debt obligations. In return for its obligation, the Fund would receive from the counterparty a periodic stream of payments, which may be based on, among other things, a fixed or floating rate of interest, over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would keep the stream of payments, and would have no payment obligations to the counterparty. The Fund may sell credit protection in order to earn additional income and/or to take a synthetic long position in the underlying security or basket of securities.

The Fund may enter into credit default swap contracts as protection buyer in order to hedge against the risk of default on the debt of a particular issuer or basket of issuers or attempt to profit from a deterioration or perceived deterioration in the creditworthiness of the particular issuer(s) (also known as buying credit protection). This would involve the risk that the investment may expire worthless and would only generate gain in the event of an actual default by the issuer(s) of the underlying obligation(s) (or, as applicable, a credit downgrade or other indication of financial instability). It would also involve the risk that the seller may fail to satisfy its payment obligations to the Fund. The purchase of credit default swaps involves costs, which will reduce the Fund's return.

Credit default swaps involve a number of special risks. A protection seller may have to pay out amounts following a negative credit event greater than the value of the reference obligation delivered to it by its counterparty and the amount of periodic payments previously received by it from the counterparty. When the Fund acts as a seller of a credit default swap, it is exposed to, among other things, leverage risk because if an event of default occurs the seller must pay the buyer the full notional value of the reference obligation. While certain types of credit default swaps are subject to clearing requirements, each party to an over-the-counter credit default swap is subject to the credit risk of its counterparty (the risk that its counterparty may be unwilling or unable to perform its obligations on the swap as they come due). The value of the credit default swap to each party will change based on changes in the actual or perceived creditworthiness of the underlying issuer.

A protection buyer may lose its investment and recover nothing should an event of default not occur. The Fund may seek to realize gains on its credit default swap positions, or limit losses on its positions, by selling those positions in the secondary market. There can be no assurance that a liquid secondary market will exist at any given time for any particular credit default swap or for credit default swaps generally.

The market for credit default swaps has become more volatile in recent years as the creditworthiness of certain counterparties has been questioned and/or downgraded. The parties to a credit default swap may be required to post collateral to each other, and the Fund may need to post collateral to a clearinghouse for cleared credit default swaps. If the Fund posts initial or periodic collateral to a counterparty, it may not be able to recover that collateral from the counterparty in accordance with the terms of the swap. In addition, if the Fund receives collateral from its counterparty, it may be delayed or prevented from realizing on the collateral in the event of the insolvency or bankruptcy of the counterparty. The Fund may exit its obligations under a credit default swap only by terminating the contract and paying applicable breakage fees, or by entering into an offsetting credit default swap position, which may cause the Fund to incur more losses.

The Fund's obligations under a credit default swap agreement will be accrued daily (offset against any amounts owing to the Fund). In connection with credit default swaps in which the Fund is the buyer, the Fund will segregate or " earmark " cash or assets determined to be liquid, or enter into certain offsetting positions, with a value at least equal to the Fund's exposure (any accrued but unpaid net amounts owed by the Fund to any counterparty), on a marked-to-market basis. In connection with credit default swaps in which the Fund is the seller, the Fund will

segregate or “earmark” cash or assets determined to be liquid, or enter into offsetting positions, with a value at least equal to the full notional amount of the swap (minus any amounts owed to the Fund). Such segregation or “earmarking” seeks to ensure that the Fund has assets available to satisfy its obligations with respect to the transaction and will limit any potential leveraging of the Fund’s portfolio. However, such segregation or “earmarking” will not limit the Fund’s exposure to loss.

### **Emerging Markets**

The Fund may also invest in developing or emerging market securities. The considerations noted above regarding the risk of investing in foreign securities are generally more significant for investments in emerging or developing countries, such as countries in Eastern Europe, Latin America, South America or Southeast Asia. These countries may have relatively unstable governments and securities markets in which only a small number of securities trade. Markets of developing or emerging countries may generally be more volatile than markets of developed countries. Investment in these markets may involve significantly greater risks, as well as the potential for greater gains.

### **Equity Securities**

All investments in equity securities are subject to market risks that may cause their prices to fluctuate over time. Historically, the equity markets have moved in cycles and the value of the securities in the Fund’s portfolio may fluctuate substantially from day to day. Owning an equity security can also subject the Fund to the risk that the issuer may discontinue paying dividends.

*Common Stocks.* A common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company’s business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which the Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to the Fund as a holder of common stock. It is possible that all assets of that company will be exhausted before any payments are made to the Fund.

*Convertible Securities.* The Fund may invest in convertible securities. Traditional convertible securities include corporate bonds, notes and preferred stocks that may be converted into or exchanged for common stock, and other securities that also provide an opportunity for equity participation. These securities are convertible either at a stated price or a stated rate (that is, for a specific number of shares of common stock or other security). As with other fixed income securities, the price of a convertible security generally varies inversely with interest rates. While providing a fixed income stream, a convertible security also affords the investor an opportunity, through its conversion feature, to participate in the capital appreciation of the common stock into which it is convertible. As the market price of the underlying common stock declines, convertible securities tend to trade increasingly on a yield basis and so may not experience market value declines to the same extent as the underlying common stock. When the market price of the underlying common stock increases, the price of a convertible security tends to rise as a reflection of higher yield or capital appreciation. In such situations, the Fund may have to pay more for a convertible security than the value of the underlying common stock.

*Initial Public Offerings.* The Fund may purchase shares in initial public offerings (“IPOs”). Because IPO shares frequently are volatile in price, the Fund may hold IPO shares for a very short period of time. This may increase the turnover of the Fund’s portfolio and may lead to increased expenses to the Fund, such as brokerage commissions and transaction costs. By selling shares, the Fund may realize taxable capital gains that it will subsequently distribute to shareholders. Investing in IPOs increases risk because IPO shares are frequently volatile in price. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio.

*Preferred Stock.* Preferred stocks are equity securities that often pay dividends at a specific rate and have a preference over common stocks in dividend payments and liquidation of assets. A preferred stock has a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer’s growth may be limited. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.

*Rights and Warrants.* The Fund may invest in rights and warrants. A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock and it is issued at a predetermined price in proportion to the number of shares already owned. Rights normally have a short life, usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the current market. Warrants are options to purchase equity securities at a specific price for a specific period of time. They do not represent ownership of the securities, but only the right to buy them. Hence, warrants have no voting rights, pay no dividends and have no rights with respect to the assets of the corporation issuing them. The value of warrants is derived solely from capital appreciation of the underlying equity securities. Warrants differ from call options in that the underlying corporation issues warrants, whereas call options may be written by anyone.

An investment in rights and warrants may entail greater risks than certain other types of investments. Generally, rights and warrants do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, although their value is influenced by the value of the underlying security, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. Investing in rights and warrants increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

### **Exchange Traded Notes (“ETNs”)**

The Fund may gain exposure to the commodities markets through investments in ETNs, the value of which may be influenced by, among other things, time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying markets, the performance of the reference instrument, changes in the issuer’s credit rating and economic, legal, political or geographic events that affect the reference instrument. An ETN that is tied to a reference instrument, such as a commodities based index, may not replicate the performance of the reference instrument.

### **Foreign Investments**

The Fund may make investments in securities of non-U.S. issuers (“foreign securities”). Such securities include Depositary Receipts (“DRs”), which are American Depositary Receipts (“ADRs”), European Depositary Receipts (“EDRs”), Global Depositary Receipts (“GDRs”) or other forms of DRs. DRs are receipts typically issued in connection with a U.S. or foreign bank or trust company which evidence ownership of underlying securities issued by a non-U.S. company.

ADRs are depositary receipts for foreign securities denominated in U.S. dollars and traded on U.S. securities markets. These securities may not necessarily be denominated in the same currency as the securities for which they may be exchanged. These are certificates evidencing ownership of shares of a foreign-based issuer held in trust by a bank or similar financial institutions. Designed for use in U.S. securities markets, ADRs are alternatives to the purchase of the underlying securities in their national market and currencies. ADRs may be purchased through “sponsored” or “unsponsored” facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depositary, whereas a depositary may establish an unsponsored facility without participation by the issuer of the depositary security. Holders of unsponsored depositary receipts generally bear all the costs of such facilities and the depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts of the deposited securities.

Investments in foreign securities involve certain inherent risks, including the following:

*Political and Economic Factors.* Individual economies of certain countries may differ favorably or unfavorably from the United States’ economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, diversification and balance of payments position. The internal politics of certain foreign countries may not be as stable as those of the United States. Governments in certain foreign countries also continue to participate to a significant degree, through ownership interest or regulation, in their respective economies. Action by these governments could include restrictions on foreign investment, nationalization, expropriation of goods or imposition of taxes, and could have a significant effect on market prices of securities and payment of interest. The economies of many foreign countries are heavily dependent upon international trade and are accordingly affected by the trade policies and economic conditions of their trading partners. Enactment by these

trading partners of protectionist trade legislation could have a significant adverse effect upon the securities markets of such countries.

*Legal and Regulatory Matters.* Certain foreign countries may have less supervision of securities markets, brokers and issuers of securities, and less financial information available to issuers, than is available in the United States.

*Currency Fluctuations.* A change in the value of any foreign currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of an ADR's underlying portfolio securities denominated in that currency. Such changes will affect the Fund to the extent that the Fund is invested in ADRs comprised of foreign securities.

*Foreign Taxes.* The interest and dividends payable to the Fund on certain of the Fund's foreign securities may be subject to foreign taxes or withholding, thus reducing the net amount of income available for distribution to Fund shareholders. The Fund may not be eligible to pass through to its shareholders any tax credits or deductions with respect to such foreign taxes or withholding.

### **Hedging Transactions**

The Adviser employs various hedging techniques. The success of the Fund's hedging strategy will be subject to the Adviser's ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged.

Since the characteristics of many securities change as markets change or time passes, the success of the Fund's hedging strategy will also be subject to the Adviser's ability to continually recalculate, readjust, and execute hedges in an efficient and timely manner. For a variety of reasons, the Adviser may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Such imperfect correlation may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. In addition, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs.

### **Private Investments**

*Private Placement and Restricted Securities.* The Fund may invest in securities that are purchased in private placements and, accordingly, are subject to restrictions on resale as a matter of contract or under federal securities laws. Because there may be relatively few potential purchasers for such investments, especially under adverse market or economic conditions or in the event of adverse changes in the financial condition of the issuer, the Fund could find it more difficult to sell such securities when the Adviser believes it advisable to do so or may be able to sell such securities only at prices lower than if such securities were more widely held. At times, it may also be more difficult to determine the fair value of such securities for purposes of computing the Fund's net asset value.

While such private placements may offer attractive opportunities for investment not otherwise available on the open market, the securities so purchased are often restricted securities, *i.e.*, securities which cannot be sold to the public without registration under the Securities Act or the availability of an exemption from registration (such as Rules 144 or 144A), or which are not readily marketable because they are subject to other legal or contractual delays in or restrictions on resale.

The absence of a trading market can make it difficult to ascertain a market value for illiquid investments. Disposing of illiquid investments may involve time-consuming negotiation and legal expenses, and it may be difficult or impossible for the Fund to sell them promptly at an acceptable price. The Fund may have to bear the extra expense of registering such securities for resale and the risk of substantial delay in effecting such registration. In addition, market quotations are less readily available. The judgment of the Adviser may at times play a greater role in valuing these securities than in the case of publicly traded securities.

Generally speaking, restricted securities may be sold only to qualified institutional buyers, or in a privately negotiated transaction to a limited number of purchasers, or in limited quantities after they have been held for a specified period of time and other conditions are met pursuant to an exemption from registration, or in a public offering for which a registration statement is in effect under the Securities Act. The Fund may be deemed to be an underwriter for purposes of the Securities Act when selling restricted securities to the public, and in such event the Fund may be liable to purchasers of such securities if the registration statement prepared by the issuer, or the Prospectuses forming a part of it, is materially inaccurate or misleading.

*Redeemable Securities.* Certain securities held by the Fund may permit the issuer at its option to call or redeem its securities. If an issuer were to redeem securities held by the Fund during a time of declining interest rates, the Fund may not be able to reinvest the proceeds in securities providing the same investment return as the securities redeemed.

### **Hybrid Securities**

The Fund may acquire hybrid securities. A third party may create a hybrid security by combining an income-producing debt security (“income producing component”) and the right to receive payment based on the change in the price of an equity security (“equity component”). The income-producing component is achieved by investing in non-convertible, income-producing securities such as bonds, preferred stocks and money market instruments, which may be represented by derivative instruments. The equity component is achieved by investing in securities or instruments such as cash-settled warrants to receive a payment based on whether the price of a common stock surpasses a certain exercise price. A hybrid security comprises two or more separate securities, each with its own market value. Therefore, the market value of a hybrid security is the sum of the values of its income-producing component and its equity component.

*Structured Investments.* A structured investment is a security having a return tied to an underlying index or other security or asset class. Structured investments generally are individually negotiated agreements and may be traded over-the-counter. Structured investments are organized and operated to restructure the investment characteristics of the underlying security. This restructuring involves the deposit with or purchase by an entity, such as a corporation or trust, or specified instruments (such as commercial bank loans) and the issuance by that entity or one or more classes of securities (“structured securities”) backed by, or representing interests in, the underlying instruments. The cash flow on the underlying instruments may be apportioned among the newly issued structured securities to create securities with different investment characteristics, such as varying maturities, payment priorities and interest rate provisions, and the extent of such payments made with respect to structured securities is dependent on the extent of the cash flow on the underlying instruments. Because structured securities typically involve no credit enhancement, their credit risk generally will be equivalent to that of the underlying instruments. Investments in structured securities are generally of a class of structured securities that is either subordinated or unsubordinated to the right of payment of another class. Subordinated structured securities typically have higher yields and present greater risks than unsubordinated structured securities. Structured securities are typically sold in private placement transactions, and there currently is no active trading market for structured securities. Investments in government and government-related and restructured debt instruments are subject to special risks, including the inability or unwillingness to repay principal and interest, requests to reschedule or restructure outstanding debt and requests to extend additional loan amounts.

### **Investment in Other Investment Companies**

As with other investments, investments in other investment companies, including exchange traded funds (“ETFs”), are subject to market and selection risk. In addition, if the Fund acquires shares of investment companies, shareholders bear both their proportionate share of expenses in the Fund (including management and advisory fees) and, indirectly, the expenses of the investment companies. ETFs are investment companies whose shares are bought and sold on a securities exchange. An ETF holds a portfolio of securities designed to track a particular market segment or index. The Fund could purchase an ETF to temporarily gain exposure to a portion of the U.S. or foreign market while awaiting an opportunity to purchase securities directly. The risks of owning an ETF generally reflect the risks of owning the underlying securities or commodities they are designed to track, although lack of liquidity in an ETF could result in it being more volatile than the underlying portfolio of securities or commodities and ETFs have management fees that increase their costs versus the costs of owning the underlying securities directly.

The Fund may also invest in money market mutual funds. An investment in a money market mutual fund is not insured or guaranteed by a Federal Deposit Insurance Corporation or any other government agency. Although such funds seek to preserve the value of the Fund’s investment at \$1.00 per share, it is possible to lose money by investing in a money market mutual fund.

### **Management**

If the Fund’s investment committee members make poor investment decisions, it will negatively affect the Fund’s investment performance.

## **Momentum Style**

Investing in or having exposure to securities with positive momentum entails investing in securities that have had above-average recent returns. These securities may be more volatile than a broad cross-section of securities. In addition, there may be periods when the momentum style is out of favor, and during which the investment performance of a fund using a momentum strategy may suffer.

## **Mortgage-Backed Securities**

The Fund may invest in securities that directly or indirectly represent participations in, or are collateralized by, payable from, mortgage loans secured by real property (“Mortgage-Backed Securities”).

Mortgage-Backed Securities represent direct or indirect participations in, or are secured by and payable from, mortgage loans secured by real property, and include single- and multi-class pass-through securities and collateralized mortgage obligations (“CMOs”). Such securities may be issued or guaranteed by U.S. Government agencies or instrumentalities, such as Ginnie Mae, Federal National Mortgage Association (“FNMA”), commonly known as “Fannie Mae,” Federal Home Loan Mortgage Corporation (“FHLMC”), commonly known as “Freddie Mae,” or by private issuers, generally originators and investors in mortgage loans, including savings associations, mortgage bankers, commercial banks, investment bankers and special purpose entities (collectively, “private lenders”).

Mortgage-backed securities issued by private lenders may be supported by pools of mortgage loans or other mortgage-backed securities that are guaranteed, directly or indirectly, by the U.S. Government or one of its agencies or instrumentalities, or they may be issued without any governmental guarantee of the underlying mortgage assets but with some form of non-governmental credit enhancement. Until 2008, FNMA and FHLMC were government-sponsored corporations owned entirely by private stockholders. In September 2008, at the direction of the U.S. Department of the Treasury, FNMA and FHLMC were placed into conservatorship under the Federal Housing Finance Agency (“FHFA”). The U.S. Government also took steps to provide additional financial support to FNMA and FHLMC. No assurance can be given that the U.S. Treasury initiatives with respect to FNMA and FHLMC will be successful.

Investing in mortgage-backed securities involves certain unique risks in addition to those generally associated with investing in fixed income securities and in the real estate industry in general. These unique risks include the failure of a party to meet its commitments under the related operative documents, adverse interest rate changes and the effects of prepayments on mortgage cash flows. Mortgage-backed securities are “pass-through” securities, meaning that principal and interest payments made by the borrower on the underlying mortgages are passed through to the Fund. The value of mortgage-backed securities, like that of traditional fixed income securities, typically increases when interest rates fall and decreases when interest rates rise. However, mortgage-backed securities differ from traditional fixed income securities because of their potential for prepayment without penalty. The price paid by the Fund for its mortgage-backed securities, the yield the Fund expects to receive from such securities and the average life of the securities are based on a number of factors, including the anticipated rate of prepayment of the underlying mortgages. In a period of declining interest rates, borrowers may prepay the underlying mortgages more quickly than anticipated, thereby reducing the yield to maturity and the average life of the mortgage-backed securities. Moreover, when the Fund reinvests the proceeds of a prepayment in these circumstances, it will likely receive a rate of interest that is lower than the rate on the security that was prepaid.

## **Municipal Securities**

The Fund may invest in municipal securities. Municipal securities are issued by the states, territories and possessions of the United States, their political subdivisions (such as cities, counties and towns) and various authorities (such as public housing or redevelopment authorities), instrumentalities, public corporations and special districts (such as water, sewer or sanitary districts) of the states, territories, and possessions of the United States or their political subdivisions. In addition, municipal securities include securities issued by or on behalf of public authorities to finance various privately operated facilities, such as industrial development bonds, that are backed only by the assets and revenues of the non-governmental user (such as hospitals and airports).

Municipal securities are issued to obtain funds for a variety of public purposes, including general financing for state and local governments, or financing for specific projects or public facilities. Municipal securities are classified as

general obligation or revenue bonds or notes. General obligation securities are secured by the issuer's pledge of its full faith, credit and taxing power for the payment of principal and interest. Revenue securities are payable from revenue derived from a particular facility, class of facilities, or the proceeds of a special excise tax or other specific revenue source, but not from the issuer's general taxing power. Private activity bonds and industrial revenue bonds do not carry the pledge of the credit of the issuing municipality, but generally are guaranteed by the corporate entity on whose behalf they are issued.

Municipal leases are entered into by state and local governments and authorities to acquire equipment and facilities such as fire and sanitation vehicles, telecommunications equipment, and other assets. Municipal leases (which normally provide for title to the leased assets to pass eventually to the government issuer) have evolved as a means for governmental issuers to acquire property and equipment without meeting the constitutional and statutory requirements for the issuance of debt. The debt-issuance limitations of many state constitutions and statutes are deemed to be inapplicable because of the inclusion in many leases or contracts of "non-appropriation" clauses that provide that the governmental issuer has no obligation to make future payments under the lease or contract unless money is appropriated for such purpose by the appropriate legislative body on a yearly or other periodic basis.

Shareholders should note that, although interest paid on municipal securities is generally exempt from regular federal income tax, the Fund does not anticipate holding municipal securities or shares of other regulated investment companies in sufficient quantities to qualify to pay exempt-interest dividends. As a result, distributions by the Fund to its shareholders are expected to be treated for federal income tax purposes as ordinary dividends without regard to the character in the hands of the Fund of any interest that it receives on municipal securities.

### **Short Sales**

The Fund enters into a short sale by selling a security it has borrowed (typically from a broker or other institution). If the market price of a security increases after the Fund borrows the security, the Fund will suffer a (potentially unlimited) loss when it replaces the borrowed security at the higher price. In certain cases, purchasing a security to cover a short position can itself cause the price of the security to rise further, thereby exacerbating the loss. In addition, the Fund may not always be able to borrow the security at a particular time or at an acceptable price. The Fund may also take a short position in a derivative instrument, such as a future, forward or swap. A short position in a derivative instrument involves the risk of a theoretically unlimited increase in the value of the underlying instrument. Short sales also involve transaction and other costs that will reduce potential Fund gains and increase potential Fund losses.

### **Real Estate Investment Trusts**

A real estate investment trust ("REIT") is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets certain definitional requirements of the Internal Revenue Code of 1986, as amended (the "Code"). The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level federal income tax. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

REITs are characterized as equity REITs, mortgage REITs, and hybrid REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depend upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs combine the characteristics of both equity and mortgage REITs, generally by holding both ownership interests and mortgage interests in real estate. The value of securities issued by REITs are affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for the favorable U.S. federal income tax status generally available to REITs under the Code or to maintain exemption from the 1940 Act.

When the Fund invests in REITs, it is subject to risks principally associated with investing in real estate: (1) possible declines in the value of real estate, (2) adverse general and local economic conditions, (3) possible lack of availability of mortgage funds, (4) changes in interest rates, and (5) environmental problems. In addition, real estate investment trusts are subject to other risks related specifically to their structure and focus: (a) dependency upon management skills; (b) limited diversification; (c) the risks of locating and managing financing for projects; (d) heavy cash flow dependency; (e) possible default by borrowers; (f) the costs and potential losses of self-liquidation of one or more holdings; (g) the possibility of failing to maintain exemptions from securities registration; (h) duplicative fees; and in many cases, relatively small market capitalization, which may result in less market liquidity and greater price volatility.

### **Short-Term, Temporary, and Cash Investments**

In response to adverse market, economic, political or other conditions, the Fund may assume a temporary defensive position and invest, without limitation, in high quality fixed income securities, money market instruments, and money market mutual funds, cash or prime quality cash equivalents, in such amounts as the Adviser deems appropriate under the circumstances, including when the Adviser believes the Fund needs to retain cash. During such times, the Fund may not achieve its investment objectives.

The Fund may invest in any of the following securities and instruments:

*Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits.* The Fund may acquire certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by the Fund will be dollar denominated obligations of domestic or foreign banks or financial institutions which at the time of purchase have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government. If the Fund holds instruments of foreign banks or financial institutions, it may be subject to additional investment risks that are different in some respects from those incurred by a fund that invests only in debt obligations of U.S. domestic issuers. See "Foreign Securities" above. Such risks include future political and economic developments, the possible imposition of withholding taxes by the particular country in which the issuer is located on interest income payable on the securities, the possible seizure or nationalization of foreign deposits, the possible establishment of exchange controls or the adoption of other foreign governmental restrictions which might adversely affect the payment of principal and interest on these securities.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans which may be made and interest rates which may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operations of the banking industry.

As a result of federal and state laws and regulations, domestic banks are, among other things, required to maintain specified levels of reserves, limited in the amount which they can loan to a single borrower, and subject to other regulations designed to promote financial soundness. However, such laws and regulations do not necessarily apply to foreign bank obligations that the Fund may acquire.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under its investment objectives and policies stated above and in its Prospectus, the Fund may make interest bearing time or other interest bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

*Savings Association Obligations.* The Fund may invest in certificates of deposit (interest bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

*Commercial Paper, Short Term Notes and Other Corporate Obligations.* The Fund may invest a portion of its assets in commercial paper and short term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short term notes will consist of issues rated at the time of purchase “A-2” or higher by Standard & Poor’s (“S&P”), “Prime-1” by Moody’s Investors Service, Inc. (“Moody’s”), or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by the Adviser to be of comparable quality. These rating symbols are described in **Appendix A.**

### **Illiquid Investments and Restricted Securities**

The Fund may not acquire an illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments. An illiquid investment is any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. If illiquid investments exceed 15% of the Fund’s net assets, certain remedial actions will be taken as required by Rule 22e-4 under the 1940 Act and the Fund’s policies and procedures.

Restricted securities are securities subject to legal or contractual restrictions on their resale, such as private placements. Such restrictions might prevent the sale of restricted securities at a time when the sale would otherwise be desirable. Under SEC regulations, certain restricted securities acquired through private placements can be traded freely among qualified purchasers. While restricted securities are generally classified as illiquid, the SEC has stated that an investment company’s board of directors, or its investment adviser acting under authority delegated by the board, may determine that a security eligible for trading under this rule is “liquid.” The Fund intends to rely on this rule, to the extent appropriate, to deem specific securities acquired through private placement as “liquid.” The Board has delegated to the Adviser, pursuant to guidelines established by the Board, the responsibility for determining whether a particular security eligible for trading under this rule is “liquid.” Investing in these restricted securities could have the effect of increasing the Fund’s illiquidity if qualified purchasers become, for a time, uninterested in buying these securities.

Restricted securities may be sold only (1) pursuant to SEC Rule 144A or another exemption, (2) in privately negotiated transactions or (3) in public offerings with respect to which a registration statement is in effect under the Securities Act of 1933, as amended. Rule 144A securities, although not registered in the U.S., may be sold to qualified institutional buyers in accordance with Rule 144A under the Securities Act of 1933, as amended. As noted above, the Adviser, acting pursuant to guidelines established by the Board, may determine that some Rule 144A securities are liquid. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a restricted security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than prevailed when it decided to sell.

Illiquid investments may be difficult to value, and the Fund may have difficulty disposing of such investments promptly. The Fund does not consider non-U.S. securities to be restricted if they can be freely sold in the principal markets in which they are traded, even if they are not registered for sale in the U.S.

### **Borrowing**

Though the Fund does not currently intend to borrow money, the Fund is authorized to borrow money from banks from time to time for temporary, extraordinary or emergency purposes or for clearance of transactions, and not for the purpose of leveraging its investments, in amounts not to exceed at any time 33-1/3% of the value of its total assets at the time of such borrowings, as allowed under the 1940 Act. The use of borrowing by the Fund involves special risk considerations that may not be associated with other funds having similar objectives and policies. Since substantially all of the Fund’s assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of the Fund’s agreement with its lender, the NAV per share of the Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if the Fund did not borrow. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds.

Under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

### **Liquidity Risk Management**

Rule 22e-4 under the 1940 Act (the “Liquidity Rule”) requires open-end funds to establish a liquidity risk management program (the “Liquidity Program”) and enhance disclosures regarding fund liquidity. As required by the Liquidity Rule, the Fund has implemented a Liquidity Program, and the Board has appointed an administrator of the Liquidity Program. Under the Liquidity Program, the Fund’s liquidity risk is assessed, managed, and periodically reviewed. The Liquidity Rule defines “liquidity risk” as the risk that the Fund could not meet requests to redeem shares issued by the Fund without significant dilution of the remaining investors’ interest in the Fund. The liquidity of the Fund’s portfolio investments is determined based on relevant market, trading and investment-specific considerations under the Liquidity Program.

### **Cyber Security**

Investment companies, such as the Fund, and their service providers may be subject to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber-attacks affecting the Fund or the Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Fund. For instance, cyber-attacks may interfere with the processing of shareholder transactions, impact the Fund’s ability to calculate its net asset value, cause the release of private shareholder information or confidential company information, impede trading, subject the Fund to regulatory fines or financial losses, and cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Fund invest, which could result in material adverse consequences for such issuers, and may cause the Fund’s investment in such portfolio companies to lose value

## **INVESTMENT RESTRICTIONS**

---

### **Fundamental Investment Policies**

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the affirmative vote of the holders of a “majority of a Fund’s outstanding voting securities” as defined in the 1940 Act. Under the 1940 Act, the “vote of the holders of a majority of the outstanding voting securities” means the vote of the holders of the lesser of (i) 67% of the shares of a Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of a Fund.

The Fund’s fundamental policies are as follows:

- (1) The Fund may not borrow money except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (2) The Fund may not engage in the business of underwriting the securities of other issuers except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (3) The Fund may lend money or other assets to the extent permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (4) The Fund may not issue senior securities except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.

- (5) The Fund may not purchase or sell real estate except as permitted by (i) the 1940 Act, or interpretations or modifications by the SEC, SEC staff or other authority of competent jurisdiction, or (ii) exemptive or other relief or permission from the SEC, SEC staff or other authority of competent jurisdiction.
- (6) The Fund may purchase or sell commodities or contracts related to commodities in compliance with any applicable provisions of the federal securities or commodities laws.
- (7) The Fund may not invest more than 25% of the market value of its total assets in the securities of companies engaged in any one industry. (Does not apply to investments in the securities of other investment companies or securities of the U.S. government, its agencies or instrumentalities.)
- (8) With respect to 75% of its total assets, the Fund may not invest more than 5% of its total assets in securities of a single issuer or hold more than 10% of the voting securities of such issuer. (Does not apply to investments in the securities of other investment companies or securities of the U.S. government, its agencies or instrumentalities.)

### **Additional Information about Fundamental Investment Policies**

The following provides additional information about the Fund's fundamental investment policies. This information does not form part of the Fund's fundamental investment policies.

With respect to the fundamental policy relating to borrowing money set forth in (1) above, the 1940 Act permits a fund to borrow money in amounts of up to one-third of the fund's total assets from banks for any purpose, and to borrow up to 5% of the fund's total assets from banks or other lenders for temporary purposes. To limit the risks attendant to borrowing, the 1940 Act requires a fund to maintain at all times an "asset coverage" of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of the fund's total assets, minus liabilities other than borrowings, bears to the aggregate amount of all borrowings. Borrowing money to increase a fund's investment portfolio is known as "leveraging." Borrowing, especially when used for leverage, may cause the value of a fund's shares to be more volatile than if the fund did not borrow. This is because borrowing tends to magnify the effect of any increase or decrease in the value of a fund's portfolio holdings. Borrowed money thus creates an opportunity for greater gains, but also greater losses. To repay borrowings, a fund may have to sell securities at a time and at a price that is unfavorable to the fund. There also are costs associated with borrowing money, and these costs would offset and could eliminate a fund's net investment income in any given period. The policy in (1) above will be interpreted to permit the Fund to engage in trading practices and investments that may be considered to be borrowing to the extent permitted by the 1940 Act. Reverse repurchase agreements may be considered to be a type of borrowing. Short-term credits necessary for the settlement of securities transactions and arrangements with respect to securities lending will not be considered to be borrowings under the policy.

With respect to the fundamental policy relating to underwriting set forth in (2) above, the 1940 Act does not prohibit a fund from engaging in the underwriting business or from underwriting the securities of other issuers; in fact, the 1940 Act permits a fund to have underwriting commitments of up to 25% of its assets under certain circumstances. Those circumstances currently are that the amount of a fund's underwriting commitments, when added to the value of the fund's investments in issuers where the fund owns more than 10% of the outstanding voting securities of those issuers, cannot exceed the 25% cap. A fund engaging in transactions involving the acquisition or disposition of portfolio securities may be considered to be an underwriter under the Securities Act of 1933, as amended (the "1933 Act"). Under the 1933 Act, an underwriter may be liable for material omissions or misstatements in an issuer's registration statement or prospectus. Securities purchased from an issuer and not registered for sale under the 1933 Act are considered restricted securities. There may be a limited market for these securities. If these securities are registered under the 1933 Act, they may then be eligible for sale but participating in the sale may subject the seller to underwriter liability. These risks could apply to a fund investing in restricted securities. Although it is not believed that the application of the 1933 Act provisions described above would cause a fund to be engaged in the business of underwriting, the policy in (2) above will be interpreted not to prevent the Fund from engaging in transactions involving the acquisition or disposition of portfolio securities, regardless of whether the Fund may be considered to be an underwriter under the 1933 Act.

With respect to the fundamental policy relating to lending set forth in (3) above, the 1940 Act does not prohibit a fund from making loans; however, SEC staff interpretations currently prohibit funds from lending more than one-third of their total assets, except through the purchase of debt obligations or the use of repurchase agreements.

(A repurchase agreement is an agreement to purchase a security, coupled with an agreement to sell that security back to the original seller on an agreed-upon date at a price that reflects current interest rates. The SEC frequently treats repurchase agreements as loans.) While lending securities may be a source of income to a fund, as with other extensions of credit, there are risks of delay in recovery or even loss of rights in the underlying securities should the borrower fail financially. However, loans would be made only when the Adviser believes the income justifies the attendant risks. In addition, collateral arrangements with respect to options, forward currency and futures transactions and other derivative instruments, as well as delays in the settlement of securities transactions, will not be considered loans.

With respect to the fundamental policy relating to issuing senior securities set forth in (4) above, “senior securities” are defined as fund obligations that have a priority over the fund’s shares with respect to the payment of dividends or the distribution of fund assets. The 1940 Act prohibits a fund from issuing senior securities except that the fund may borrow money in amounts of up to one-third of the fund’s total assets from banks for any purpose. A fund also may borrow up to 5% of the fund’s total assets from banks or other lenders for temporary purposes, and these borrowings are not considered senior securities. The issuance of senior securities by a fund can increase the speculative character of the fund’s outstanding shares through leveraging. Leveraging of a fund’s portfolio through the issuance of senior securities magnifies the potential for gain or loss on monies, because even though the fund’s net assets remain the same, the total risk to investors is increased. Certain widely used investment practices that involve a commitment by a fund to deliver money or securities in the future are not considered by the SEC to be senior securities, provided that a fund segregates cash or liquid securities in an amount necessary to pay the obligation or the fund holds an offsetting commitment from another party. These investment practices include repurchase and reverse repurchase agreements, swaps, dollar rolls, options, futures and forward contracts. The policy in (4) above will be interpreted not to prevent collateral arrangements with respect to swaps, options, forward or futures contracts or other derivatives, or the posting of initial or variation margin.

With respect to the fundamental policy relating to real estate set forth in (5) above, the 1940 Act does not prohibit a fund from owning real estate. Investing in real estate may involve risks, including that real estate is generally considered illiquid and may be difficult to value and sell. Owners of real estate may be subject to various liabilities, including environmental liabilities. The policy in (5) above will be interpreted not to prevent the Funds from investing in real estate-related companies, companies whose businesses consist in whole or in part of investing in real estate, instruments (like mortgages) that are secured by real estate or interests therein, or real estate investment trust securities.

With respect to the fundamental policy relating to commodities set forth in (6) above, the 1940 Act does not prohibit a fund from owning commodities, whether physical commodities and contracts related to physical commodities (such as oil or grains and related futures contracts), or financial commodities and contracts related to financial commodities (such as currencies and, possibly, currency futures). If a fund were to invest in a physical commodity or a physical commodity-related instrument, the fund would be subject to the additional risks of the particular physical commodity and its related market. The value of commodities and commodity-related instruments may be extremely volatile and may be affected either directly or indirectly by a variety of factors. There also may be storage charges and risks of loss associated with physical commodities. The policy in (6) above will be interpreted to permit investments in exchange traded funds that invest in physical and/or financial commodities.

With respect to the fundamental policy relating to concentration set forth in (7) above, the 1940 Act does not define what constitutes “concentration” in an industry. The SEC staff has taken the position that investment of more than 25% of a fund’s total assets in one or more issuers conducting their principal activities in the same industry or group of industries constitutes concentration. It is possible that interpretations of concentration could change in the future. A fund that invests a significant percentage of its total assets in a single industry may be particularly susceptible to adverse events affecting that industry and may be more risky than a fund that does not concentrate in an industry. The policy in (7) above will be interpreted to refer to concentration as that term may be interpreted from time to time. The policy also will be interpreted to permit investment without limit in the following: securities of the U.S. Government and its agencies or instrumentalities; and repurchase agreements collateralized by any such obligations. Accordingly, issuers of the foregoing securities will not be considered to be members of any industry. The policy also will be interpreted to give broad authority to the Fund as to how to classify issuers within or among industries. When identifying industries for purposes of its concentration policy, the Funds may rely upon available industry

classifications. The Fund will consider both the borrower and the institution selling a loan participation as an issuer for purposes of the Fund's concentration policy.

The Fund's fundamental policies are written and will be interpreted broadly. For example, the policies will be interpreted to refer to the 1940 Act and the related rules as they are in effect from time to time, and to interpretations and modifications of or relating to the 1940 Act by the SEC and others as they are given from time to time. When a policy provides that an investment practice may be conducted as permitted by the 1940 Act, the policy will be interpreted to mean either that the 1940 Act expressly permits the practice or that the 1940 Act does not prohibit the practice. In complying with its fundamental and non-fundamental investment restrictions, the Fund will aggregate its direct investments with its Subsidiary's investments when testing for compliance with each investment restriction of the Fund

## **POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS**

---

The Trust has adopted policies and procedures that govern the disclosure of the Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of Fund shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Fund shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Fund's shareholders and those of affiliates.

The Fund discloses its portfolio holdings by mailing the annual and semi-annual reports to shareholders and by filing Form N-CSR, N-PORT with the SEC. The Fund's Form N-CSR and Form N-PORT are available on the SEC's website at [www.sec.gov](http://www.sec.gov).

The Fund also discloses portfolio holdings to the general public, on the Fund's website at [www.fulcrumassetfunds.com](http://www.fulcrumassetfunds.com). Portfolio holdings may be disclosed monthly, no earlier than 30 days following the month end. In addition, top positional holdings and portfolio-related statistical information may be disclosed quarterly no earlier than 14 days after the end of each calendar quarter.

The Fund may make portfolio holdings available to industry databases only after such holdings have been disclosed to the general public either through the Fund's website or SEC filings.

The Fund may choose to make portfolio holdings information available to rating agencies such as Lipper, Morningstar or Bloomberg earlier and more frequently on a confidential basis.

Under limited circumstances, as described below, the Fund's portfolio holdings may be disclosed to, or known by, certain third parties in advance of their disclosure on the Fund's website and/or filing with the SEC. In each case, a determination has been made by the Trust's Chief Compliance Officer that such advance disclosure is supported by a legitimate business purpose of the Fund and that the recipient is subject to a duty to keep the information confidential and is prohibited from trading on material non-public information.

Separate account clients of the Adviser have access to their portfolio holdings and are not subject to the Fund's portfolio holdings disclosure policies. Some of the separate accounts managed by the Adviser may have investment objectives and strategies that are substantially similar or identical to the Fund's, and therefore potentially substantially similar, and in certain cases nearly identical, portfolio holdings, as the Fund.

**The Adviser.** Personnel of the Adviser, including personnel responsible for managing the Fund's portfolio, may have full daily access to Fund portfolio holdings since that information is necessary in order for the Adviser to provide its management, administrative, and investment services to the Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, as demand and liquidity of such securities, as well as for the assistance of portfolio managers in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

**Ultimus Fund Solutions, LLC.** Ultimus Fund Solutions, LLC is the transfer agent, fund accountant, administrator and custody administrator for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Fund.

**U.S. Bank National Association.** U.S. Bank National Association is custodian for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Fund.

**Cohen & Company, Ltd.** Cohen & Company, Ltd. is the Fund's independent registered public accounting firm; therefore, its personnel have access to the Fund's portfolio holdings in connection with auditing of the Fund's annual financial statements.

**Thompson Hine LLP.** Thompson Hine LLP is counsel to the Fund; therefore, its personnel have access to the Fund's portfolio holdings in connection with review of the Fund's annual and semi-annual shareholder reports and SEC filings.

### **Additions to List of Approved Recipients**

The Trust's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Fund's portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information in connection with the operation or administration of the Fund, as determined by the Trust's Chief Compliance Officer, and must be subject to a duty to keep the information confidential and not trade on any material, non-public information. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Fund, the Adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

### **Compliance With Portfolio Holdings Disclosure Procedures**

The Trust's Chief Compliance Officer reports periodically to the Board with respect to compliance with the Fund's portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Fund from the potential misuse of holdings information by individuals or firms in possession of that information.

## **MANAGEMENT**

---

The business of the Trust is managed under the direction of the Board, in accordance with the Agreement and Declaration of Trust and the Trust's By-laws (the "Governing Documents"), which have been filed with the SEC and are available upon request. The Board consists of four(4) individuals, three (3) of whom are not "interested persons" (as defined under the 1940 Act) of the Trust or any investment adviser to any series of the Trust ("Independent Trustees"). Pursuant to the Governing Documents, the Board shall elect officers including a President, a Secretary, a Treasurer, a Principal Executive Officer and a Principal Accounting Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust's purposes. The Board, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties. Board Leadership Structure

The Trust is led by Joseph Breslin, who has served as the Chairman of the Board since July 2015. The Board is comprised of three independent Trustees. Additionally, under certain 1940 Act governance guidelines that apply to the Trust, the Independent Trustees meet in executive session, at least quarterly. Under the Governing Documents, the Chairman of the Board is responsible for (a) presiding at board meetings, (b) calling special meetings on an as-needed basis, (c) executing and administering of Trust policies including (i) setting the agendas for board meetings and (ii) providing information to board members in advance of each board meeting and between board meetings. The Trust believes that its Chairman, the independent chair of the Audit Committee, and, as an entity, the full Board, provide effective leadership that is in the best interests of the Trust, its funds and each shareholder.

## **Board Risk Oversight**

The Board has a standing independent Audit Committee, Nominating and Governance Committee and Contract Review Committee, each with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial reporting and risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information. The primary purposes of the Nominating and Governance Committee are to consider and evaluate the structure, composition and operation of the Board, to evaluate and recommend individuals to serve on the Board, and to consider and make recommendations relating to the compensation of the Trust's independent trustees. The Nominating and Governance Committee may consider recommendations for candidates to serve on the Board from any source it deems appropriate. The primary purpose of the Contract Review Committee is to oversee and guide the process by which the Independent Trustees annually consider whether to approve or renew the Trust's investment advisory, sub-advisory and distribution agreements, Rule 12b-1 plans, and such other agreements or plans involving the Trust as specified in the Contract Review Committee's charter or as the Board determines from time to time. The Board may also assign to the Contract Review Committee responsibility to evaluate and make recommendations on contracts in unusual situations, for example, where a contract is expected to terminate because of a change of control of an investment adviser.

## **Trustee Qualifications**

Generally, the Trust believes that each Trustee is competent to serve because of his or her individual overall merits including his or her: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills. Mr. Breslin has over 20 years of business experience in the investment management and brokerage business and possesses a strong understanding of the regulatory framework under which investment companies must operate based, in part, upon his years of service as an officer and/or Trustee to other registered investment companies. Thomas Sarkany is qualified to serve as a Trustee based on his experience in various business and consulting positions, and through his experience from service as a board member of the Trust and other investment companies. Since 2010, he has been the President of a financial services firm and from 1994 through 2010, held various roles at a publicly held company providing financial research, publications and money management services to retail and institutional investors, including Director of Marketing and Asset Management, Director of Index Licensing, and member of the Board of Directors. In addition to his service as a Trustee of the Trust, Mr. Sarkany serves as a trustee of the Northern Lights Fund Trust II and has previously served as a director of certain public companies. Charles R. Ranson has more than 20 years' experience in strategic analysis and planning, risk assessment, and capital formation in the operation of complex organizations and entrepreneurial ventures. In addition to his service to the Trust, Mr. Ranson serves as an independent trustee to another mutual fund complex. Wendy Wang has more than 30 years' experience in the mutual fund tax and compliance services industry. Ms. Wang has served as a Senior Vice President and Director of Tax and Compliance Administration of Ultimus since 2019, overseeing both the Post Trade Compliance team and the Tax team at Ultimus. Each Trustee's ability to perform his duties effectively also has been enhanced by his educational background and professional training. The Trust does not believe any one factor is determinative in assessing a Trustee's qualifications, but that the collective experience of each Trustee makes them each highly qualified.

The following is a list of the Trustees and executive officers of the Trust and each person's principal occupation over the last five years. The business address of each Trustee and Officer is 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246. All correspondence to the Trustees and Officers should be directed to c/o Ultimus Fund Solutions, LLC, P.O. Box 541150, Omaha, Nebraska 68154.

### *Independent Trustees*

<b>Name, Address and Year of Birth</b>	<b>Position/Term of Office*</b>	<b>Principal Occupation During the Past Five Years</b>	<b>Number of Funds in Fund Complex** Overseen by Trustee</b>	<b>Other Directorships held by Trustee During the Past Five Years</b>
Joseph Breslin Year of Birth: 1953	Independent Trustee and Chairman of the Board since 2015	President and Consultant, Adviser Counsel, Inc. (formerly J.E. Breslin & Co.) (management consulting firm to investment advisers), (since 2009); Senior Counsel, White Oak Global Advisors, LLC. (since 2016).	1	Northern Lights Fund Trust IV (for series not affiliated with the Fund since 2015); Director, Kinetics Mutual Funds, Inc. (since 2000); Trustee, Kinetics Portfolios Trust (since 2000); Trustee, Forethought Variable Insurance Trust (since 2013).
Thomas Sarkany Year of Birth: 1946	Independent Trustee since 2015	Founder and President, TTS Associates Inc. (since December 2022); and Founder and President, TTS Consultants, LLC (financial services) (since 2010).	1	Northern Lights Fund Trust IV (for series not affiliated with the Fund since 2015); Arrow Investments Trust (since 2014), Arrow ETF Trust (since 2012), Trustee, Northern Lights Fund Trust II (since 2011); Director, Aquila Distributors (since 1981)
Charles Ranson Year of Birth: 1947	Independent Trustee since 2015	Principal, Ranson & Associates (strategic analysis and planning, including risk assessment and capital formation for entrepreneurial ventures) (since 2003).	1	Northern Lights Fund Trust IV (for series not affiliated with the Fund since 2015); Advisors Preferred Trust (since November 2012)

### *Interested Trustee, Officers*

<b>Name, Address and Year of Birth</b>	<b>Position/Term of Office*</b>	<b>Principal Occupation During the Past Five Years</b>	<b>Number of Funds in Fund Complex** Overseen by Trustee</b>	<b>Other Directorships held by Trustee During the Past Five Years</b>
Wendy Wang*** 80 Arkay Drive Hauppauge, NY 11788 Year of Birth: 1970	Trustee since 2023, President since 2015	Senior Vice President, Director of Tax and Compliance Administration, Ultimius Fund Solutions, LLC (since 2012).	1	N/A
Sam Singh 80 Arkay Drive Hauppauge, NY 11788 Year of Birth: 1976	Treasurer since 2015	Vice President, Ultimius Fund Solutions, LLC (since 2015).	N/A	N/A
Jennifer Farrell 80 Arkay Drive Hauppauge, NY 11788 Year of Birth: 1969	Secretary since 2017	Associate Director (since 2022) and Manager (2018-2022), Legal Administration), Ultimius Fund Solutions, LLC; Senior Paralegal, Gemini Fund Services, LLC (since 2015).	N/A	N/A
James Ash Year of Birth: 1976	Chief Compliance Officer since 2019	Senior Vice President, Head of Compliance (since 2023); Senior Compliance Officer, Northern Lights Compliance, LLC (2019 - 2023); Senior Vice President, National Sales Gemini Fund Services, LLC (2017-2019).	N/A	N/A

\* The term of office for each Trustee and officer listed above will continue indefinitely until the individual resigns or is removed.

\*\* As of October 17, 2023, the Trust was comprised of 35 other active portfolios managed by unaffiliated investment advisers. The term “Fund Complex” applies only to the Fund. The Fund does not hold itself out as related to any other series within the Trust for investment purposes, nor does it share the same investment adviser with any other series.

\*\*\* Ms. Wang is an interested Trustee because she is also an officer of the Trust.

## **Board Committees**

### **Audit Committee**

The Board has an Audit Committee that consists of all the Independent Trustees. The Audit Committee’s responsibilities include: (i) recommending to the Board the selection, retention or termination of the Trust’s independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust’s financial statements, including any adjustment to such financial statements recommended by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust’s independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor’s independence; and (v) considering the comments of the independent auditors and management’s responses thereto with respect to the quality and adequacy of the Trust’s accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. During the fiscal year ended June 30, 2023, the Audit Committee met nine times.

### **Nominating and Governance Committee**

The Board has a Nominating and Governance Committee that consists of all the Independent Trustees. The Nominating and Governance Committee’s responsibilities (which may also be conducted by the Board) include: (i) recommending persons to be nominated or re-nominated as Trustees in accordance with the Independent Trustee’s Statement of Policy on Criteria for Selecting Independent Trustees; (ii) reviewing the Trust’s officers, and conducting CCO searches, as needed, and providing consultation regarding other CCO matters, as requested; (iii) reviewing trustee qualifications, performance, and compensation; (iv) reviewing periodically with the Board the size and composition of the Board as a whole; (v) annually evaluating the operations of the Board and its Committees and assisting the Board in conducting its annual self-evaluation; (vi) making recommendations on the requirements for, and means of, Board orientation and training; (vii) periodically reviewing the Board’s corporate governance policies and practices and recommending, as it deems appropriate, any changes to the Board; (ix) considering any corporate governance issues that arise from time to time, and to develop appropriate recommendations for the Board; and (x) supervising counsel for the Independent Trustees. Mr. Ranson serves as the Chairman of the Nominating and Governance Committee. The Nominating and Governance Committee operates pursuant to a Nominating and Governance Committee Charter. During the fiscal year ended June 30, 2023, the Nominating and Governance Committee met twice.

### **Contract Review Committee**

The Board has a Contract Review Committee that consists of all the Independent Trustees. The primary purpose of the Contract Review Committee is to oversee and guide the process by which the Independent Trustees annually consider whether to approve or renew the Trust’s investment advisory, sub-advisory and distribution agreements, Rule 12b-1 plans, and such other agreements or plans involving the Trust as specified in the Contract Review Committee’s charter or as the Board determines from time to time. The Board may also assign to the Contract Review Committee responsibility to evaluate and make recommendations on contracts in unusual situations, for example, where a contract is expected to terminate because of a change of control of an investment adviser. The Contract Review Committee’s responsibilities include: (i) identifying the scope and format of information to be requested from service providers in connection with the evaluation of each contract or plan and meet and evaluate such information at least annually in advance of the automatic expiration of such contracts by operation of law or by their terms; (ii) providing guidance to independent legal counsel regarding specific information requests to be made by such counsel on behalf of the Board or the Independent Trustees; (iii) evaluating regulatory and other developments coming to its attention that might reasonably be expected to have an impact on the Independent

Trustees’ consideration of how to evaluate and whether or not to renew a contract or plan; (iv) assisting in circumscribing the range of factors considered by the Board relating to the approval or renewal of advisory or sub-advisory agreements; (v) recommending to other committees and/or to the Independent Trustees specific steps to be taken by them regarding the renewal process, including, for example, proposed schedules of meetings by Independent Trustees; (vi) investigating and reporting on any other matter brought to its attention within the scope of its duties; and (vii) performing such other duties as are consistent with the Contract Review Committee’s purpose or that are assigned to it by the Board. Mr. Sarkany serves as the Chairman of the Contract Review Committee. The Chairman of the Contract Review Committee meets with independent trust counsel, Trust Counsel and Trust Officers quarterly to review and discuss the proposed 15(c) questionnaires submitted by each adviser/sub-adviser regarding Board approval of its investment advisory/sub-advisory contract. The Contract Review Committee operates pursuant to a Contract Review Committee Charter. During the fiscal year ended May 31, 2023, the Contract Review Committee met four times.

### Compensation

Each Independent Trustee receives a quarterly fee of \$28,750 to be paid by the Trust within 10 days of the commencement of each calendar quarter for his service as a Trustee of the Board and for serving in his respective capacity as Chair of the Audit Committee, Nominating and Governance Committee and Contract Review Committee, as well as reimbursement for any reasonable expenses incurred for attending regularly scheduled Board and Committee meetings. Additionally, in the event that an in-person meeting of the Board other than its regularly scheduled meetings (a “Special Meeting”) is required, each Independent Trustee will receive a fee of \$5,000 per Special Meeting, as well as reimbursement for any reasonable expenses incurred, to be paid by the Trust or the relevant series of the Trust or its investment adviser depending on the circumstances necessitating the Special Meeting. The Independent Trustees at their sole discretion shall determine when a particular meeting constitutes a Special Meeting for purpose of the \$5,000 fee.

Neither the Interested Trustee nor any of the executive officers receive compensation from the Trust.

The table below details the amount of compensation the Independent Trustees received from the Trust during the fiscal period March 11, 2023 to June 30, 2023. Each Independent Trustee is expected to attend all quarterly meetings during the period. The Trust does not have a bonus, profit sharing, pension or retirement plan.

<b>Name and Position</b>	<b>Aggregate Compensation From the Fund</b>	<b>Pension or Retirement Benefits Accrued as Part of Funds Expenses</b>	<b>Annual Benefits Upon Retirement</b>	<b>Total Compensation From Funds and Fund Complex* Paid to Trustees</b>
Joseph Breslin	\$960	\$0	\$0	\$960
Thomas Sarkany	\$960	\$0	\$0	\$960
Charles Ranson	\$960	\$0	\$0	\$960

\* There are currently numerous series comprising the Trust. The term “Fund Complex” refers only to the Fund.

### Management and Trustee Ownership

As of December 31, 2022, the Board and officers, as a group, owned no shares of the Fund or any of the Fund’s outstanding shares.

## CONTROL PERSONS AND PRINCIPAL HOLDERS

A principal shareholder is any person who owns of record or beneficially 5% or more of any class of the Fund's outstanding securities. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders with a controlling interest could affect the outcome of voting or the direction of management of the Fund.

As of October 2, 2023, the following shareholders of record owned 5% or more of the outstanding shares of the Fund:

<b>Super Institutional Class Shares</b>		
<b>Name &amp; Address</b>	<b>Shares</b>	<b>Percentage of Shares</b>

## INVESTMENT ADVISER

---

### Investment Adviser and Advisory Agreement

Fulcrum Asset Management LLP, Marble Arch House, 66 Seymour Street, London W1H 5BT United Kingdom, serves as the Fund's investment adviser. The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended. Andrew Stevens and Gavyn Davies each own 40% of the Adviser, with the remaining 20% owned by a group of employees of the Adviser.

Subject to the oversight of the Board, the Adviser is responsible for the overall management of the Fund's investment-related business affairs. Pursuant to an investment advisory agreement (the "Advisory Agreement") with the Trust, on behalf of the Fund, the Adviser, in conformity with the stated policies of the Fund, manages the portfolio investment operations of the Fund. The Adviser has overall supervisory responsibilities for the general management and investment of the Fund's securities portfolio, as detailed below, which are subject to review and approval by the Board. In general, the Adviser's duties include setting the Fund's overall investment strategies and asset allocation.

Pursuant to the Advisory Agreement, the Adviser, agrees to invest the assets of the Fund in accordance with applicable law and the investment objective, policies and restrictions set forth in the Fund's current Prospectus and SAI, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. The Adviser shall act as the investment adviser to the Fund and, as such shall, (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of the Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold, retained or lent by the Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser or its designee, directly, will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Fund with all necessary office facilities and personnel for servicing the Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of the Fund or the Adviser performing services relating to research, statistical and investment activities. The Advisory Agreement was approved by the Board, including by a majority of the Independent Trustees, at a meeting held on October 25, 2022.

In addition, the Adviser, provides the management and supplemental administrative services necessary for the operation of the Fund. These services include providing assistance in supervising relations with custodians, transfer and pricing agents, accountants, underwriters and other persons dealing with the Fund; assisting in the preparing of all general shareholder communications and conducting shareholder relations; assisting in maintaining the Fund's records and the registration of the Fund's shares under federal securities laws and making necessary filings under state securities laws; assisting in developing management and shareholder services for the Fund; and furnishing reports, evaluations and analyses on a variety of subjects to the Board.

The Fund pays an annual management fee (computed daily and payable monthly) of 0.90% of the Fund's average daily net assets to the Adviser pursuant to the Advisory Agreement. For the fiscal year ended June 30, 2023, the Adviser earned \$1,868,024, in advisory fees. For the fiscal years ended June 30, 2022 and June 30, 2021, the Adviser earned \$1,032,314 and \$1,152,368, respectively, in advisory fees from Fulcrum Diversified Absolute Return Fund (the "Predecessor Fund"), a series of Trust for Advised Portfolios.

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by the Fund. Under the terms of the Advisory Agreement, the Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or Distributor (as defined under the section entitled "The Distributor") (c) the fees and certain expenses of the Custodian and Transfer and Dividend Disbursing Agent (as defined under the section entitled "Transfer Agent"), including the cost of maintaining certain required records of the Fund and of pricing the Fund's shares, (d) the

charges and expenses of legal counsel and independent accountants for the Fund, (e) brokerage commissions and any issue or transfer taxes chargeable to the Fund in connection with its securities transactions, (f) all taxes and corporate fees payable by the Fund to governmental agencies, (g) the fees of any trade association of which the Fund may be a member, (h) the cost of fidelity and liability insurance, (i) the fees and expenses involved in registering and maintaining registration of the Fund and of shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Fund's registration statements and prospectuses for such purposes, (j) all expenses of shareholders and Trustees' meetings (including travel expenses of trustees and officers of the Trust who are not directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders and (k) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The Advisory Agreement continues in effect for two (2) years initially and thereafter continues from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of the Fund. The Advisory Agreement may be terminated without penalty on 60 days written notice by a vote of a majority of the Independent Trustees or by the Adviser, or by holders of a majority of the Fund's outstanding shares (with respect to the Fund). The Advisory Agreement shall terminate automatically in the event of its assignment.

Pursuant to an expense waiver and reimbursement agreement between the Advisor and the Trust, on behalf of the Fund, the Adviser has contractually agreed to waive its management fee and/or reimburse the Fund to ensure that the total annual operating expenses for the Fund, as a percentage of the Fund's average daily net assets (not including "Excluded Expenses" as discussed in the Fund's Prospectus), are limited to 1.05%, 1.05% and 1.30% of average daily net assets of the Fund's Super Institutional Class, Institutional Class and Advisor Class shares, respectively. This agreement is in effect through at least October 31, 2024. Under the expense agreement, the Advisor may request recoupment of previously waived fees and paid expenses from the Fund for three years from the date such fees and expenses were waived or paid by the Adviser, if such reimbursements will not cause the Fund to exceed the lesser of: (1) the expense limitation in place at the time of the waiver and/or expense payment; or (2) the expense limitation in place at the time of the recoupment.

## **CODES OF ETHICS**

The Trust, the Adviser and the Distributor have each adopted separate Codes of Ethics under Rule 17j-1 of the 1940 Act that governs the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under the Codes, the Trustees are permitted to invest in securities that may also be purchased by the Fund.

In addition, the Trust has adopted a code of ethics (the "Trust Code"), which applies only to the Trust's executive officers to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; (ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that the Trust files with, or submits to, the SEC and in other public communications made by the Fund; (iii) compliance with applicable governmental laws, rule and regulations; (iv) the prompt internal reporting of violations of the Trust Code to an appropriate person or persons identified in the Trust Code; and (v) accountability for adherence to the Trust Code.

## **PROXY VOTING POLICIES AND PROCEDURES**

The Board has adopted Proxy Voting Policies and Procedures (the "Policies") on behalf of the Trust which delegate the responsibility for voting proxies to the Adviser, subject to the Board's continuing oversight. The Policies require that the Adviser vote proxies received in a manner consistent with the best interests of the Fund and its shareholders. The Policies also require the Adviser to present to the Board, at least annually, the Adviser's Policies and a record of each proxy voted by the Adviser on behalf of the Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest.

Where a proxy proposal raises a material conflict between the Adviser's interests and a Fund's interests, the Adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client's directive using the recommendation of an independent third party. If the third party's recommendations are not received in a timely fashion, the Adviser will abstain from voting the securities held by that client's account. A copy of the Adviser's policies and procedures used to determine how to vote proxies related to portfolio securities can be found in **Appendix B**.

More information. Information regarding how the Fund voted proxies relating to portfolio securities held by the Fund during the most recent 12-month period ending June 30 will be available (1) without charge, upon request, by calling the Fund toll free at 855-538-5278; and (2) on the SEC's website at <http://www.sec.gov>. In addition, a copy of the Fund's proxy voting policies and procedures are also available by calling 855-538-5278 and will be sent within three business days of receipt of a request.

## THE DISTRIBUTOR

Northern Lights Distributors, LLC, located at 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022 (the "Distributor") serves as the principal underwriter and national distributor for shares of the Fund pursuant to an underwriting agreement with the Trust (the "Underwriting Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of the FINRA. The offering of shares is continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of the Fund's shares, will use reasonable efforts to facilitate the sale of the Fund's shares.

The Underwriting Agreement provides that, unless sooner terminated, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The Underwriting Agreement may be terminated by the Fund at any time, without the payment of any penalty, by vote of a majority of the entire Board of the Trust or by vote of a majority of the outstanding shares of the Fund on 60 days' written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days' written notice to the Fund. The Underwriting Agreement will automatically terminate in the event of its assignment.

The Distributor may enter into selling agreements with broker-dealers that solicit orders for the sale of shares of the Funds and may allow concessions to dealers that sell shares of the Funds.

The following table sets forth the total compensation received by the Distributor from the Fund during the fiscal period March 11, 2023 to June 30, 2023:

<i>Fund</i>	<i>Net Underwriting Discounts and Commissions</i>	<i>Compensation on Redemptions and Repurchases</i>	<i>Brokerage Commissions</i>	<i>Other Compensation</i>
Fulcrum Diversified Absolute Return Fund Class Y	\$0	\$0	\$0	*
Fulcrum Diversified Absolute Return Fund Class I	\$0	\$0	\$0	*

\* The Distributor received \$11,222 from the Adviser as compensation for its distribution services to the Funds.

**Rule 12b-1 Plan** The Trust, with respect to the Fund, has adopted the Trust's Master Distribution and Shareholder Servicing Plan pursuant to Rule 12b-1 under the 1940 Act (the "Plan") for Advisor Class Shares pursuant to which the Fund is authorized to pay the Distributor, as compensation for the Distributor's account maintenance services under the Plan. The Board has approved a distribution and shareholder servicing fee at the rate of up to 0.25% for

Advisor Class Shares of the Fund's average daily net assets attributable to the class. Such fees are to be paid by the Fund monthly, or at such other intervals as the Board shall determine. Such fees shall be based upon the Fund's average daily net assets during the preceding month, and shall be calculated and accrued daily. The Fund may pay fees to the Distributor at a lesser rate, as agreed upon by the Board and the Distributor. The Plan authorizes payments to the Distributor as compensation for providing account maintenance services to Fund shareholders, including arranging for certain securities dealers or brokers, administrators and others ("Recipients") to provide these services and paying compensation for these services. The Fund will bear its own costs of distribution with respect to its shares. The Board has not adopted a Plan for Institutional Class or Super Institutional Class shares.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Fund shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning the Fund; assisting in the establishment and maintenance of accounts or sub-accounts in the Fund and in processing purchase and redemption transactions; making the Fund's investment plan and shareholder services available; and providing such other information and services to investors in shares of the Fund as the Distributor or the Trust, on behalf of the Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to the Fund.

The Distributor does not retain any 12b-1 payments as profit. Excess 12b-1 fees are held in retention to be used for distribution related expenses.

The Distributor is required to provide a written report, at least quarterly to the Board, specifying in reasonable detail the amounts expended pursuant to the Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The Plan may not be amended to increase materially the amount of the Distributor's compensation to be paid by the Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the affected class of the Fund (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board by votes cast in person at a meeting called for the purpose of voting on the Plan. During the term of the Plan, the selection and nomination of Independent Trustees of the Trust will be committed to the discretion of the Nominating and Governance Committee. The Distributor will preserve copies of the Rule 12b-1 Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to the Plan will be in writing and provide that: (a) it may be terminated by the Trust or the Fund at any time upon sixty days written notice, without the payment of any penalty, by vote of a majority of the Board, or by vote of a majority of the outstanding voting securities of the Trust or the Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Independent Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement.

### ***Shareholder Service Plan***

Pursuant to a Shareholder Service Plan adopted by the Trust established by the Fund with respect to each share class of the Fund, the Adviser is authorized to provide, or arrange for others to provide personal shareholder services relating to the servicing and maintenance of shareholder accounts not otherwise provided to the Fund ("Shareholder Servicing Activities"). Under the Shareholder Service Plan, the Adviser may enter into shareholder service agreements with securities broker-dealers and other securities professionals ("Service Organizations") who provide Shareholder Servicing Activities for their clients invested in the Fund. Shareholder Servicing Fees are accrued daily, payments are calculated monthly and the Fund may make such payments monthly, at an annual rate of up to 0.10% and up to 0.15% of the average daily net assets of the Fund's Institutional and Advisor Class shares respectively. In the event that payments to the Adviser during a fiscal year exceed the amounts expended (or accrued, in the case of payments to Service Organizations) during a fiscal year, the Adviser will promptly refund to the Fund any such excess amount.

Shareholder Servicing Activities shall include one or more of the following: (1) establishing and maintaining accounts and records relating for shareholders of the Fund; (2) aggregating and processing orders involving the

shares of the Fund; (3) processing dividend and other distribution payments from the Fund on behalf of shareholders; (4) providing information to shareholders as to their ownership of Fund shares or about other aspects of the operations of the Fund; (5) preparing tax reports or forms on behalf of shareholders; (6) forwarding communications from the Fund to shareholders; (7) assisting shareholders in changing the Fund's records as to their addresses, dividend options, account registrations or other data; (8) providing sub-accounting with respect to shares beneficially owned by shareholders, or the information to the Fund necessary for sub-accounting; (9) responding to shareholder inquiries relating to the services performed; (10) providing shareholders with a service that invests the assets of their accounts in shares pursuant to specific or pre-authorized instructions; and (11) providing such other similar services as the Adviser may reasonably request to the extent the Service Organization is permitted to do so under applicable statutes, rules or regulations.

During the fiscal year ended June 30, 2023, the Fund paid \$75,658 in distribution related fees pursuant to the Plan.

### ***Marketing and Support Payments***

The Adviser, out of its own resources and without additional cost to the Fund or its shareholders, may provide additional cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. Such payments may be divided into categories as follows:

*Support Payments.* Payments may be made by the Adviser to certain financial intermediaries in connection with the eligibility of the Fund to be offered in certain programs and/or in connection with meetings between the Fund's representatives and financial intermediaries and its sales representatives. Such meetings may be held for various purposes, including providing education and training about the Fund and other general financial topics to assist financial intermediaries' sales representatives in making informed recommendations to, and decisions on behalf of, their clients.

*Entertainment, Conferences and Events.* The Adviser also may pay cash or non-cash compensation to sales representatives of financial intermediaries in the form of (i) occasional gifts; (ii) occasional meals, tickets or other entertainments; and/or (iii) sponsorship support for the financial intermediary's client seminars and cooperative advertising. In addition, the Adviser pays for exhibit space or sponsorships at regional or national events of financial intermediaries.

The prospect of receiving, or the receipt of additional payments or other compensation as described above by financial intermediaries may provide such intermediaries and/or their salespersons with an incentive to favor sales of shares of the Fund, and other mutual funds whose affiliates make similar compensation available, over sale of shares of mutual funds (or non-mutual fund investments) not making such payments. You may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Fund shares.

## PORTFOLIO MANAGERS

### INVESTMENT COMMITTEE

#### *Investment Committee*

The Adviser has established an Investment Committee (the “Committee”) that is jointly and primarily responsible for the day-to-day management of the Fund’s portfolio. The Committee currently is comprised of Gavyn Davies, Suhail Shaikh, CFA and Andrew Bevan, PhD. In addition to the Fund, the Committee managed the following other accounts for the Adviser as of June 30, 2023:

Type of Accounts	Total Number of Accounts by Account Type	Total Assets of Accounts(in millions)	Total Number of Accounts	Total Assets
			By Type Subject to a Performance Fee Advisory Fee is Based on Performance	by Account Type Subject to a Performance Fee (in millions) for is Based on Performance
Registered Investment Companies	1	\$227	0	\$0
Other Pooled Investment Vehicles	21	\$4,147	6	\$450
Other Accounts	6	\$1,548	2	\$609

#### *Conflicts of Interest.*

As a general matter, certain conflicts of interest may arise in connection with the Committee’s management of a Fund’s investments, on the one hand, and the investments of other accounts for which a Committee member is responsible, on the other. For example, it is possible that the various accounts managed could have different investment strategies that, at times, might conflict with one another to the possible detriment of the Fund. Alternatively, to the extent that the same investment opportunities might be desirable for more than one account, possible conflicts could arise in determining how to allocate them. Other potential conflicts might include conflicts created by specific Committee members’ compensation arrangements, and conflicts relating to selection of brokers or dealers to execute the Fund’s portfolio trades and/or specific uses of commissions from the Fund’s portfolio trades (for example, research, or “soft dollars”, if any). The Adviser has adopted policies and procedures and has structured the Committee members’ compensation in a manner reasonably designed to safeguard the Fund from being negatively affected as a result of any such potential conflicts.

#### **Compensation**

The members of the Committee are compensated based on a salary and discretionary annual bonus. The latter is based on performance of the Adviser and the individual over the previous calendar year. Annual reviews and business plans are prepared for each business unit and individual goals. Success against these business plans and individual goals are evaluated as part of the review process. This is an important determinant of year end compensation.

#### **Ownership of Securities**

The following table shows the dollar range of equity securities beneficially owned by the portfolio manager in shares of the Fund as of June 30, 2023.

Name of Portfolio Manager	Dollar Range of Equity Securities in the Fund
Gavyn Davies	>\$1,000,000
Suhail Shaikh	\$0

## ALLOCATION OF PORTFOLIO BROKERAGE

---

Specific decisions to purchase or sell securities for the Fund is made by the Portfolio Managers, who are employees of the Adviser. The Adviser is authorized by the Board to allocate the orders placed by them on behalf of the Fund to brokers or dealers who may, but need not, provide research or statistical material or other services to the Funds or the Adviser for the Fund's use. Such allocation is to be in such amounts and proportions as the Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser will take the following into consideration:

- the best net price available;
- the reliability, integrity and financial condition of the broker or dealer;
- the size of and difficulty in executing the order; and
- the value of the expected contribution of the broker or dealer to the investment performance of the Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of the Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage and research services provided to the Fund. In allocating portfolio brokerage, the Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts other than the Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit the Fund.

For the fiscal year ended June 30, 2023, the Fund paid \$87,685 in brokerage commissions.

For the fiscal year ended June 30, 2022 and June 30, 2021, the Predecessor Fund paid \$129,402 and \$128,842, respectively, in brokerage commissions.

## PORTFOLIO TURNOVER

---

The Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. The calculation excludes from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which will be borne directly by the Fund. A 100% turnover rate would occur if all of the Fund's portfolio securities were replaced once within a one-year period.

The portfolio turnover rate of the Fund for the fiscal year ended June 30, 2023 was 84%. The portfolio turnover rates of the Predecessor Fund for the fiscal years ended June 30, 2022 and June 30, 2021 was 129% and 140%, respectively.

## OTHER SERVICE PROVIDERS

---

### Fund Administrator, Fund Accounting and Transfer Agent Services

Ultimus Fund Solutions, ("UFS"), which has its principal office at 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246, serves as administrator, fund accountant and transfer agent for the Fund pursuant to the Fund Services Agreement (the "Agreement") with the Fund and subject to the supervision of the Board. UFS is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual

funds. UFS is an affiliate of the Distributor. UFS may also provide persons to serve as officers of the Fund. Such officers may be directors, officers or employees of UFS or its affiliates.

The Agreement became effective on January 22, 2021, remained in effect for two years, and will continue in effect for successive twelve-month periods provided that such continuance is specifically approved at least annually by a majority of the Board. The Agreement is terminable by the Board or UFS on 90 days' written notice and may be assigned by either party, provided that the Trust may not assign this agreement without the prior written consent of UFS. The Agreement provides that UFS shall be without liability for any action reasonably taken or omitted pursuant to the Agreement.

Under the Agreement, UFS performs administrative services, including: (1) monitoring the performance of administrative and professional services rendered to the Trust by others service providers; (2) monitoring Fund holdings and operations for post-trade compliance with the Fund's registration statement and applicable laws and rules; (3) preparing and coordinating the printing of semi-annual and annual financial statements; (4) preparing selected management reports for performance and compliance analyses; (5) preparing and disseminating materials for and attending and participating in meetings of the Board; (6) determining income and capital gains available for distribution and calculating distributions required to meet regulatory, income, and excise tax requirements; (7) reviewing the Trust's federal, state, and local tax returns as prepared and signed by the Trust's independent public accountants; (8) preparing and maintaining the Trust's operating expense budget to determine proper expense accruals to be charged to the Fund to calculate its daily net asset value; (9) assisting in and monitoring the preparation, filing, printing and where applicable, dissemination to shareholders of amendments to the Trust's Registration Statement on Form N-1A, periodic reports to the Trustees, shareholders and the SEC, notices pursuant to Rule 24f-2, proxy materials and reports to the SEC on Forms N-CEN, N-CSR, N-PORT and N-PX; (10) coordinating the Trust's audits and examinations by assisting the Fund's independent public accountants; (11) determining, in consultation with others, the jurisdictions in which shares of the Trust shall be registered or qualified for sale and facilitating such registration or qualification; (12) monitoring sales of shares and ensuring that the shares are properly and duly registered with the SEC; (13) monitoring the calculation of performance data for the Fund; (14) preparing, or causing to be prepared, expense and financial reports; (15) preparing authorizations for the payment of Trust expenses and paying, from Trust assets, all bills of the Trust; (16) providing information typically supplied in the investment company industry to companies that track or report price, performance or other information with respect to investment companies; (17) upon request, assisting the Funds in the evaluation and selection of other service providers, such as independent public accountants, printers, EDGAR providers and proxy solicitors (such parties may be affiliates of UFS) and (18) performing other services, recordkeeping and assistance relating to the affairs of the Trust as the Trust may, from time to time, reasonably request.

For the administrative services rendered to the Fund by UFS, the Fund pays UFS an asset based fee, which scales downward based upon net assets. The Fund also pays UFS for any out-of-pocket expenses.

UFS also provides the Fund with accounting services, including: (i) daily computation of net asset value; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintenance of certain books and records described in Rule 31a-1 under the 1940 Act, and reconciliation of account information and balances among the Custodian and Adviser; and (vii) monitoring and evaluation of daily income and expense accruals, and sales and redemptions of shares of the Fund.

For the fund accounting services rendered to the Fund under the Agreement, the Fund pays UFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. The Fund also pays UFS for any out-of-pocket expenses.

For the fiscal year ended June 30 2023, the Fund paid \$261,085 for administrative and accounting services.

UFS also acts as transfer, dividend disbursing, and shareholder servicing agent for the Fund pursuant to the Agreement. Under the Agreement, UFS is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

For the services rendered to the Fund by UFS, the Fund pays UFS the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets for fund administration, fund accounting and transfer agency services. The Fund also pays UFS for any out-of-pocket expenses.

For the fiscal year ended June 30, 2023, the Fund paid \$87,519 for transfer, dividend disbursing, and shareholder servicing.

For the fiscal year ended June 30, 2022 and June 30, 2021 the Predecessor Fund paid \$200,505 and \$190,740 respectively, for administrative, accounting, transfer, dividend disbursing, and shareholder services to the previous administrator.

### **Custodian**

Pursuant to a custody agreement between the Trust and U.S. Bank National Association, located at 1555 North Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212 (the "Custodian"), the Custodian serves as the custodian of the Fund's assets, holds the Fund's portfolio securities in safekeeping, and keeps all necessary records and documents relating to its duties. The Custodian is compensated with an asset-based fee plus transaction fees and is reimbursed for out-of-pocket expenses.

The Custodian and its affiliates may participate in revenue sharing arrangements with the service providers of mutual funds in which the Fund may invest. The Subsidiary's custodian is the same as the Fund's custodian.

### **Compliance Services**

Northern Lights Compliance Services, LLC ("NLCS"), 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022, an affiliate of UFS and the Fund's distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS's compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the compliance services rendered to the Fund, the Fund pays NLCS a one-time fee plus an annual asset based fee, which scales downward based upon net assets. The Fund also pays NLCS for any out-of-pocket expenses. For the fiscal year ended June 30, 2023, the Fund paid \$31,469 for compliance services.

For the fiscal year ended June 30, 2022 and June 30, 2021, the Predecessor Fund paid the previous Chief Compliance Officer \$12,637 and \$12,286, respectively, for compliance services.

## **DESCRIPTION OF SHARES**

---

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or classes. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal, per-class, dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of the Fund. All shares issued are fully paid and non-assessable.

## **ANTI-MONEY LAUNDERING PROGRAM**

---

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the

development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a providing a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

## **PURCHASE, REDEMPTION AND PRICING OF SHARES**

---

### **Calculation of Share Price**

NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the applicable Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV).

Generally, the Fund's domestic securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the NASDAQ for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Funds' fair value committee in accordance with procedures approved by the Board and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximated fair value.

Under certain circumstances, the Fund may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by the Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Fund's calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Adviser in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve

to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of the Fund's NAV by short-term traders.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services or other parties in accordance with the valuation procedures approved by the Board. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange (the "Exchange") is closed and an investor is not able to purchase, redeem or exchange shares.

Fund shares are valued at the close of regular trading on the Exchange (normally 4:00 p.m., Eastern Time) (the "Exchange Close") on each day that the Exchange is open. For purposes of calculating the NAV, the Funds normally use pricing data for domestic equity securities received shortly after the Exchange Close and do not normally take into account trading, clearances or settlements that take place after the Exchange Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are insufficient or not readily available, the Fund may value securities at fair value or estimate their value as determined in good faith by the Board or their designees, pursuant to procedures approved by the Board. Fair valuation may also be used by the Board if extraordinary events occur after the close of the relevant market but prior to the Exchange Close. The Trust expects that the Exchange will be closed on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

The Fund may hold securities, such as private placements, other non-traded securities or temporarily illiquid investments, for which market quotations are not readily available or are determined to be unreliable. These securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. The Board has designated the Adviser as its valuation designee (the "Valuation Designee") to execute these procedures. The Board may also enlist third party consultants such as a valuation specialist at a public accounting firm or a valuation consultant or financial officer of a security issuer on an as-needed basis to assist the Valuation Designee in determining a security-specific fair value. The Board is responsible for reviewing and approving fair value methodologies utilized by the Valuation Designee, approval of which shall be based upon whether the Valuation Designee followed the valuation procedures established by the Board.

Money market shares are valued by their issuers at \$1.00 per share using the amortized cost method in accordance with Rule 2a-7 under the 1940 Act.

**Fair Value Process.** Applicable investments are valued collectively by the Valuation Designee pursuant to valuation procedures established by the Board. Fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source), (ii) securities for which, in the judgment of the Valuation Designee, the prices or values available do not represent the fair value of the instrument. Factors which may cause the Valuation Designee to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; (iv) securities with respect to which an event that will affect the value thereof has occurred (a "significant event") since the closing prices were established on the principal exchange on which they are traded, but prior to the Fund's calculation of its NAV. Specifically, interests in managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid investments, such as private placements or non-traded securities are valued based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate

under the circumstances). If a current bid from such independent dealers or other independent parties is unavailable, the Valuation Designee shall determine the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Funds' holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

**Standards For Fair Value Determinations.** As a general principle, the fair value of a security is the amount that the Funds might reasonably expect to realize upon its current sale. The Trust has adopted Financial Accounting Standards Board Statement of Financial Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosures ("ASC 820"). In accordance with ASC 820, fair value is defined as the price that the Funds would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability, developed based on the best information available under the circumstances.

Various inputs are used in determining the value of the Fund's investments relating to ASC 820. These inputs are summarized in the three broad levels listed below.

Level 1 – quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

**Board Determination.** The Board meets at least quarterly to consider the valuations provided by the Valuation Designee to ratify the valuations made for the applicable securities. The Board considers the reports provided by the Valuation Designee, including follow up studies of subsequent market-provided prices when available, in reviewing and determining in good faith the fair value of the applicable portfolio securities.

### **Purchase of Shares**

Orders for shares received by the Fund in good order prior to the close of business on NYSE on each day during such periods that NYSE is open for trading are priced at the public offering price, which is NAV plus any sales charge, or at NAV per share on a per-class basis (if no sales charges apply) computed as of the close of the regular session of trading on the Exchange. Orders received in good order after the close of NYSE, or on a day it is not open for trading, are priced at the close of NYSE on the next day on which it is open for trading at the next determined NAV per share plus sales charges, if any. The Fund and the Adviser each reserve the right to waive any investment minimum requirement as described in the prospectus.

### **Redemption of Shares**

The Fund will redeem all or any portion of a shareholder's shares of the Fund when requested in accordance with the procedures set forth in the "How to Redeem Shares" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

- (a) when the Exchange is closed, other than customary weekend and holiday closings;

(b) when trading on that exchange is restricted for any reason;

(c) when an emergency exists as a result of which disposal by the Fund of securities owned is not reasonably practicable or it is not reasonably practicable for the Fund to fairly to determine the value of net assets, provided that applicable rules and regulations of the SEC (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or

(d) when the SEC by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension.

Supporting documents in addition to those listed under "How to Redeem Shares" in the Prospectus will be required from executors, administrators, trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, trust instruments, certificates of death, appointments as executor, and certificates of corporate authority and waiver of tax required in some states when settling estates.

*Waivers of Redemption Fees:* The Fund has elected not to impose the redemption fee for:

- redemptions and exchanges of Fund shares acquired through the reinvestment of dividends and distributions;
- certain types of redemptions and exchanges of Fund shares owned through participant-directed retirement plans;
- redemptions or exchanges in discretionary asset allocation, fee based or wrap programs ("wrap programs") that are initiated by the sponsor/financial adviser as part of a periodic rebalancing;
- redemptions or exchanges in a fee based or wrap program that are made as a result of a full withdrawal from the wrap program or as part of a systematic withdrawal plan including the Fund's systematic withdrawal plan; involuntary redemptions, such as those resulting from a shareholder's failure to maintain a minimum investment in the Fund, or to pay shareholder fees; or
- other types of redemptions as the Adviser or the Trust may determine in special situations and approved by the Adviser's chief compliance officer.

## **TAX STATUS**

---

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax adviser regarding their investment in the Funds.

The Fund intends to qualify as regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Tax Code"), which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, the Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of the Fund will be computed in accordance with Section 852 of the Tax Code.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of the Fund. Capital losses may be carried forward indefinitely and retain the character of the original loss. Capital loss carryforwards are available to offset future realized capital gains. To the extent that these carryforwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders.

As of June 30, 2023, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed Ordinary Income	Undistributed Long-Term Gains	Post October Loss and Late Year Loss	Capital Loss Carry Forwards	Other Book/Tax Differences	Unrealized Appreciation/ (Depreciation)
\$ —	\$ —	\$ (8,125,558)	\$ —	\$ —	\$ 442,023
Total					
Distributable Earnings					
(Accumulated Deficit)					
\$ (7,683,535)					

The Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Tax Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain will be made after the end of each fiscal year, and no later than December 31 of each year. Both types of distributions will be in shares of the Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Tax Code, the Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If the Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it may be able to pay a tax penalty on the portion of income that caused to inadvertently violate Subchapter M or it will be treated as a corporation for federal income tax purposes. If treated as a corporation, the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Fund generally would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from the Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

The Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Tax Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was

neither distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, the Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Tax Code.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain, regardless of the length of time the shares of the Fund have been held by such shareholders.

Certain U.S. shareholders, including individuals and estates and trusts, will be subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from the Fund and net gains from the disposition of shares of the Fund. U.S. shareholders are urged to consult their own tax advisers regarding the implications of the additional Medicare tax resulting from an investment in the Fund.

A redemption of the Fund's shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Tax Code, the Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Tax Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

#### Other Reporting and Withholding Requirements

Payments to a shareholder that is either a foreign financial institution ("FFI") or a non-financial foreign entity ("NFFE") within the meaning of the Foreign Account Tax Compliance Act ("FATCA") may be subject to a generally nonrefundable 30% withholding tax on: (a) income dividends paid by the Fund and (b) certain capital gain distributions and the proceeds arising from the sale of Fund shares paid by the Fund after. FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be

required if a foreign entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

#### Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, a certain percentage of the Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regular investment company that is accorded special tax treatment.

#### Passive Foreign Investment Companies

Investment by the Fund in certain PFICs could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, the Fund may elect to treat a PFIC as a qualified electing fund ("QEF"), in which case the Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether it receives any distribution from the company.

The Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

#### Foreign Currency Transactions

The Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

#### Foreign Taxation

Income received by the Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to the Fund's shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as

a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of the Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders of the Fund. With respect to the Fund, gains from the sale of securities will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

#### Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If the Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount, which is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year the Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisers about the application of federal, state and local and foreign tax law in light of their particular situation.

## **INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

---

Cohen & Company, Ltd, 342 North Water Street, Suite 830, Milwaukee, WI 53202 is the independent registered public accounting firm for the Fund, whose services include auditing the Fund's financial statements and the performance of related tax services.

## **LEGAL COUNSEL**

---

Thompson Hine LLP, 41 S. High Street, Suite 1700, Columbus, OH 43215, serves as legal counsel to the Trust.

Maples and Calder, PO Box 309, Ugland House, Grand Cayman, KY1-1104, Cayman Islands, serves as legal counsel to the Subsidiary.

## **FINANCIAL STATEMENTS**

---

The financial statements for the Fund and the independent registered public accounting firm's report included in the Fund's [annual report to shareholders](#) for the fiscal year ended June 30, 2023, is a separate document and the financial statements, accompanying notes and report of the independent registered public accounting firm appearing therein are incorporated by reference into this SAI. You can obtain the annual report without charge on the SEC's website at [www.sec.gov](http://www.sec.gov), upon written request, or request by telephone at 855-538-5278.

## Appendix A

### DESCRIPTION OF SECURITIES RATINGS

#### Short-Term Credit Ratings

A *Standard & Poor's* short-term issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation having an original maturity of no more than 365 days. The following summarizes the rating categories used by Standard & Poor's for short-term issues:

“A-1” – A short-term obligation rated “A-1” is rated in the highest category and indicates that the obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” – A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

“A-3” – A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

“B” – A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitments.

“C” – A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

“D” – A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless Standard & Poor's believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to “D” if it is subject to a distressed exchange offer.

Local Currency and Foreign Currency Risks – Standard & Poor's issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer's foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

**Moody's Investors Service ("Moody's")** short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect the likelihood of a default on contractually promised payments. Ratings may be assigned to issuers, short-term programs or to individual short-term debt instruments.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

"P-1" – Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

"P-2" – Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

"P-3" – Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

"NP" – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

**Fitch, Inc. / Fitch Ratings Ltd. ("Fitch")** short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term ratings are assigned to obligations whose initial maturity is viewed as "short-term" based on market convention. Typically, this means up to 13 months for corporate, sovereign and structured obligations, and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

"F1" – Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

"F2" – Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

"F3" – Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

"B" – Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

"C" – Securities possess high short-term default risk. Default is a real possibility.

"RD" – Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

“D” – Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

The **DBRS® Ratings Limited (“DBRS”)** short-term debt rating scale provides an opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. Ratings are based on quantitative and qualitative considerations relevant to the issuer and the relative ranking of claims. The R-1 and R-2 rating categories are further denoted by the sub-categories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by DBRS for commercial paper and short-term debt:

“R-1 (high)” - Short-term debt rated “R-1 (high)” is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“R-1 (middle)” – Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“R-1 (low)” – Short-term debt rated “R-1 (low)” is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“R-2 (high)” – Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

“R-2 (middle)” – Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

“R-2 (low)” – Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” – Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” – Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” – Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” – Short-term debt rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

### **Long-Term Credit Ratings**

The following summarizes the ratings used by *Standard & Poor’s* for long-term issues:

“AAA” – An obligation rated “AAA” has the highest rating assigned by Standard & Poor’s. The obligor’s capacity to meet its financial commitment on the obligation is extremely strong.

“AA” – An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitment on the obligation is very strong.

“A” – An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitment on the obligation is still strong.

“BBB” – An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” – Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

“BB” – An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.

“B” – An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitment on the obligation.

“CCC” – An obligation rated “CCC” is currently vulnerable to nonpayment, and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

“CC” – An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred, but Standard & Poor’s expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” – An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

“D” – An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless Standard & Poor’s believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to “D” if it is subject to a distressed exchange offer.

Plus (+) or minus (-) – The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

“NR” – This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that Standard & Poor’s does not rate a particular obligation as a matter of policy.

Local Currency and Foreign Currency Risks - Standard & Poor’s issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer’s foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

**Moody’s** long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of one year or more. Such ratings reflect both the likelihood of default on contractually promised payments and the expected financial loss suffered in the event of default. The following summarizes the ratings used by Moody’s for long-term debt:

“Aaa” – Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” – Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” – Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” – Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” – Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” – Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” – Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” – Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” – Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification from “Aa” through “Caa.” The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

The following summarizes long-term ratings used by *Fitch*:

“AAA” – Securities considered to be of the highest credit quality. “AAA” ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” – Securities considered to be of very high credit quality. “AA” ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” – Securities considered to be of high credit quality. “A” ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” – Securities considered to be of good credit quality. “BBB” ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

“BB” – Securities considered to be speculative. “BB” ratings indicate that there is an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

“B” – Securities considered to be highly speculative. “B” ratings indicate that material credit risk is present.

“CCC” – A “CCC” rating indicates that substantial credit risk is present.

“CC” – A “CC” rating indicates very high levels of credit risk.

“C” – A “C” rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned “RD” or “D” ratings, but are instead rated in the “B” to “C” rating categories, depending upon their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” obligation rating category, or to corporate finance obligation ratings in the categories below “CCC”.

The **DBRS** long-term rating scale provides an opinion on the risk of default. That is, the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims. All rating categories other than AAA and D also contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS for long-term debt:

“AAA” - Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” – Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” – Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” – Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” – Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” – Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” – Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” – A security rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

### **Municipal Note Ratings**

A **Standard & Poor's** U.S. municipal note rating reflects Standard & Poor's opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, Standard & Poor's analysis will review the following considerations:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” – A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” – A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” – A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

**Moody's** uses the Municipal Investment Grade (“MIG”) scale to rate U.S. municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels – “MIG-1” through “MIG-3” while speculative grade short-term obligations are designated “SG”. The following summarizes the ratings used by Moody's for short-term municipal obligations:

“MIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” – Is assigned to an unrated obligation.

In the case of variable rate demand obligations (“VRDOs”), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody’s evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody’s evaluation of risk associated with the ability to receive purchase price upon demand (“demand feature”). The second element uses a rating from a variation of the MIG rating scale called the Variable Municipal Investment Grade or “VMIG” scale. The rating transitions on the VMIG scale differ from those on the Prime scale to reflect the risk that external liquidity support generally will terminate if the issuer’s long-term rating drops below investment grade.

VMIG rating expirations are a function of each issue’s specific structural or credit features.

“VMIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-2” – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-3” – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“SG” – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

“NR” – Is assigned to an unrated obligation.

### **About Credit Ratings**

A *Standard & Poor’s* issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects Standard & Poor’s view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

*Moody’s* credit ratings must be construed solely as statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities.

*Fitch’s* credit ratings provide an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Fitch credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance

with the terms on which they invested. Fitch's credit ratings cover the global spectrum of corporate, sovereign (including supranational and sub-national), financial, bank, insurance, municipal and other public finance entities and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

**DBRS** credit ratings are opinions based on the quantitative and qualitative analysis of information sourced and received by DBRS, which information is not audited or verified by DBRS. Ratings are not buy, hold or sell recommendations and they do not address the market price of a security. Ratings may be upgraded, downgraded, placed under review, confirmed and discontinued.

## **Appendix B**

### **Fulcrum Diversified Absolute Return Fund**

#### **Proxy Voting Policy**

In accordance with Rule 206(4)-6 under the Advisers Act and the Stewardship Code, it is the policy of the Firm to vote all proxies in the best interests of its clients. The Compliance Officer is responsible for ensuring adherence to this policy.

The Firm has a commitment to evaluate and to vote proxy in what it believes is the best interests of its clients. The Firm uses Glass Lewis's platform for proxy voting. Fulcrum will vote in line with these independent research recommendations unless it chooses to override them based on its own analysis. When choosing to override the recommendation, the Firm will generally vote proxy proposals, amendments, consents or resolutions relating to client securities, including interests in private investment funds, if any, on a case-by-case basis and in accordance with the following guidelines:

- a. Support a current management initiative if the Firm's view of the issuer's management is favourable;
- b. Vote to change the management structure of an issuer if it would increase shareholder value;
- c. Vote against management if there is a clear conflict between the issuer's management and shareholder interest;
- d. In some cases, even if the Firm supports an issuer's management, there may be some corporate governance issues that the Firm believes should be subject to shareholder approval; and/or
- e. May abstain from voting proxies when it is determined that the cost of voting the proxy exceeds the expected benefit to our clients.

Decisions to follow or override the recommendations of our proxy advisor are made by Fulcrum's Stewardship Committee. If we identify systematic divergences between final voting instructions and recommendations, they are communicated in regular reviews with the proxy advisor. For more details on our approach and outcomes, please see the proxy voting policy and stewardship reports, available on Fulcrum's website. The Compliance Officer is to ensure that the voting of all proxies is done in a timely manner and to monitor the effectiveness of these policies.

The Compliance Officer will maintain the following records:

- A record of each proxy received (if it's in e-mail form from the prime broker, a copy of the e-mail).
- A record of each proxy executed and the reason behind the voting decision if such decision was inconsistent with the general guidelines above.
- A record of each proxy abstained and the reason behind the abstention.
- All documents which were material to the voting decision including documents which were created by the investment committee members (e.g. spreadsheets).
- Written requests from an investor for information on how the Firm voted proxies and it's response to any request (oral or written) from the investor for such proxy voting information.
- A written record of all disclosures, resolutions and determination of proxy vote arising from a conflict of interest.

The Compliance Officer will maintain such records for a period of 5 years, the first 2 years in the office and the additional 3 years in an easily accessible place.
